

PNC Equity Funds

PNC Emerging Markets Equity Fund (Class R6: PEREX)

PNC International Growth Fund (Class R6: PIRSX)

Beginning on January 1, 2021, as permitted by regulations adopted by the U.S. Securities and Exchange Commission, paper copies of the Funds' annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Funds' website (www.pncfunds.com), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from a Fund electronically anytime by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by calling 1-800-622-FUND (3863) or by sending an e-mail request to pncfundfulfillment@pnc.com.

Beginning on January 1, 2019, you may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. If you invest directly with a Fund, you can call 1-800-622-FUND (3863) or send an email request to pncfundfulfillment@pnc.com to let the Fund know you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all Funds held in your account if you invest through your financial intermediary or all Funds held with the fund complex if you invest directly with a Fund.

If you have any questions about any part of this prospectus or wish to obtain additional information about PNC Funds, please visit pncfunds.com or call 800-622-FUND (3863).

PNC EMERGING MARKETS EQUITY FUND

INVESTMENT OBJECTIVE

The Fund seeks to provide long-term capital appreciation.

FUND FEES AND EXPENSES

The following table describes the fees and expenses that you may pay if you buy and hold Fund shares.

Shareholder Fees (fees paid directly from your investment)	
Class R6	
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None
Maximum Deferred Sales Charge (Load) (as a percentage of net asset value)	None
Redemption Fee	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Class R6	
Management Fees	1.00%
Distribution (12b-1) Fees	None
Other Expenses ¹	1.34%
Shareholder Servicing Fees	None
Other	1.34%
Total Annual Fund Operating Expenses	2.34%
Fee Waiver and Expense Reimbursement ²	1.09%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ²	1.25%

¹ "Other Expenses" are estimated for the current fiscal year. "Other Expenses" include indirect fees and expenses of Acquired Funds that do not exceed 0.01% of the average net assets of the Fund. "Acquired Fund" means any investment company in which the Fund invests or has invested during the period.

² PNC Capital Advisors, LLC (the "Adviser") has contractually agreed to waive Management Fees and reimburse or pay certain operating expenses for the Fund to the extent the Fund's Total Annual Fund Operating Expenses exceed 1.24% for Class R6 Shares, excluding certain expenses such as extraordinary expenses, acquired fund fees and expenses, taxes, brokerage commissions, dealer and underwriter spreads, commitment fees on leverage facilities, prime broker fees and expenses, interest expense, and dividend expenses related to short sales. This expense limitation continues through January 31, 2020, at which time the Adviser will determine whether to renew, revise, or discontinue it, except that it may be terminated by the Board of Trustees of PNC Funds (the "Board") at any time. The Adviser can be reimbursed by the Fund for any contractual fee reductions or expense reimbursements if reimbursement to the Adviser (a) occurs within the three years following the year in which the Fund accrues a liability or recognizes a contingent liability with respect to such amounts paid, waived, or reimbursed by the Adviser and (b) does not cause the Total Annual Fund Operating Expenses of a class to exceed the percentage expense limitation that was in effect (i) at the time the Adviser paid, waived or reimbursed the amount being repaid by the Fund or (ii) at the time of the reimbursement by the Fund. Any recoupment of fees waived or expenses reimbursed would be subject to the terms of any expense limitation agreement in place at the time of the recoupment.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in Class R6 Shares of the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5%

return each year, and that the Fund's operating expenses remain the same, except that the Fee Waiver and Expense Reimbursement is reflected only in the one-year period below. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class R6 Shares	\$127	\$626	\$1,151	\$2,592

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 36% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Under normal circumstances, the Fund invests at least 80% of its net assets plus any borrowings for investment purposes in equity securities of issuers tied economically to emerging market countries ("emerging market issuers"). Emerging market issuers include companies meeting one or more of the following criteria: (i) the principal trading market for the issuer's securities is in an emerging market country; (ii) the issuer derives at least 50% of its total revenue or profit from goods produced or sold and investments made or services performed in emerging market countries; (iii) the issuer has at least 50% of its assets in emerging market countries; or (iv) the company is organized under the laws of, or has a principal office in, an emerging market country. Emerging market countries include any country represented in any widely recognized index of emerging market or frontier market securities, such as the MSCI Emerging Markets Index, MSCI ACWI ex USA Index, and the MSCI Frontier Markets Index. Emerging markets include frontier markets and most countries in the world other than Australia, Canada, Japan, New Zealand, the United Kingdom, the United States, most of the countries of Western Europe, and Hong Kong. "Frontier markets" refers to the markets of smaller, less accessible, but still investable, countries of the developing world.

The Fund may make significant investments in issuers located or doing business in a single country or geographic region. The Fund may invest in securities across all market capitalizations, and the Fund may invest a significant portion of its assets in companies of any one particular market capitalization category.

PNC Capital Advisors, LLC's (the "Adviser") investment process seeks to identify companies with robust and sustainable growth rates, high-quality balance sheets, and management teams with clearly defined growth strategies. In allocating the Fund's assets across geographies, the Adviser uses

PNC EMERGING MARKETS EQUITY FUND

its proprietary, multi-factor country allocation model to identify and score countries based on factors such as the economic and financial market conditions within each country, specifically economic growth projections, stock market valuation, risk position, and stock market momentum. Next, the Adviser applies a bottom-up security selection screen, which scores all stocks with a particular market capitalization based on growth, profitability and momentum factors, to yield a pool of securities for further fundamental analysis and review. The Adviser's portfolio construction process seeks to combine the best investment candidates within the Adviser's recommended framework of country allocations and security selections.

The Fund may invest in securities denominated in any currency, including U.S. dollars, other developed market currencies, such as the euro, yen, and pound sterling, and the currencies of the emerging markets in which the Fund may invest. The Fund typically does not seek to limit its foreign currency exposure, but the Adviser may determine in its discretion to seek to hedge some of its currency exposures back to the U.S. dollar. For example, the Fund may utilize currency forwards to seek to reduce the effect of changes in currency exchange rates on the Fund's performance, where practical. The Fund may also use exchange-traded futures for the efficient management of cash flows and to gain exposure to the asset classes discussed above.

The Fund's investment strategy may involve, at times, investing a significant portion of its assets in one or more industries or sectors that the Adviser believes hold high potential. To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund's exposure to various risks may be heightened, including price volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.

The Fund's investments in equity securities may include, for example, common and preferred stocks, American Depositary Receipts and Global Depositary Receipts, other U.S. listings of foreign common stocks, and exchange-traded funds ("ETFs"). The Fund may also invest in fixed income securities of any credit quality or duration, including bonds rated below investment grade (commonly referred to as "junk" bonds), warrants and rights, participation notes, or other structured products. The Fund may use ETFs, closed-end funds, and derivative instruments to gain exposure to markets, a particular index, or a particular issuer or security.

Derivative instruments in which the Fund may invest include, but are not limited to, swaps, forward currency contracts, futures and structured notes. The Fund may use derivatives as a substitute for taking a position in an underlying asset, to increase returns, to manage risk, or as part of a hedging

strategy. Although the Fund may invest in derivatives of any kind, it expects to use futures contracts, forward currency contracts, and options on futures contracts for the purpose of managing exposure to the securities markets or to movements in interest rates or currency values. The Fund may also use futures to gain exposure to a specific country, region, index or issuer. These instruments are not typically used for the purpose of introducing leverage in the Fund, though they may have that result.

The Fund utilizes an active trading approach.

The Fund will provide shareholders with at least 60 days' written notice before changing its 80% policy discussed above.

PRINCIPAL RISKS

Active Trading Risk. To the extent that the Fund buys and sells securities actively, it could have higher expenses (which reduce return for shareholders) and higher taxable distributions.

Capitalization Risk. Small-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. Therefore, small-cap stocks may be more volatile than those of larger companies and may have less liquidity, which can reduce their selling prices. Mid-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. As a result, the values of mid-cap-company stocks may be more volatile than those of larger companies.

Country Risk. Significant investment in a particular country will make the Fund's performance more dependent upon the political, economic, and other circumstances relevant to that country than a mutual fund more widely diversified among issuers in different countries.

Currency Risk. To the extent that the Fund invests directly in foreign currencies or in securities that are denominated in, trade in, and pay revenues in, foreign currencies, or derivatives that provide exposure to foreign currencies, the Fund will be exposed to the risk that the currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the hedged currency. Currency exchange rates in foreign countries may fluctuate significantly over short or long periods of time due to changes in interest rates, intervention (or lack thereof) by governments, central banks, or supranational entities, such as the International Monetary Fund, or the imposition of currency controls or other political or economic developments. As a result, the Fund's investments in foreign currency-denominated securities may reduce the returns of the Fund.

Currency risk may be especially high if the Fund invests in foreign currencies or engages in foreign currency transactions that are economically tied to emerging or frontier market countries, which may give rise to market, credit, currency, liquidity, legal, political, and other risks different from, or greater than, the risks of investing in developed foreign

PNC EMERGING MARKETS EQUITY FUND

currencies or engaging in foreign currency transactions that are economically tied to developed foreign countries.

Derivatives Risk. Derivatives are financial instruments whose values depend upon, or are derived from, the value of a reference asset, such as one or more underlying assets, indexes, or currencies and may include, but are not limited to, options, swaps, forward currency contracts, futures, and options on futures. A small investment in derivatives could have a potentially large impact on the Fund's performance. The use of derivatives involves risks different from those associated with investing directly in the reference asset. Derivatives can be volatile, illiquid, and difficult to value, and an imperfect correlation may exist between changes in the value of a derivative held by the Fund and the value of the reference asset. Generally speaking, some derivatives are "leveraged" and therefore may magnify or otherwise increase investment losses to the Fund. A small investment in derivatives can have a significant impact on the Fund's exposure to, among other things, securities' market values, interest rates, or currency exchange rates. The Fund's use of derivatives may also affect the amount, timing or character of distributions payable to, and thus taxes payable by, shareholders. In addition, there is also the risk that the Fund may be unable to terminate or sell a derivatives position. There is also the risk that derivative counterparties may suffer financial difficulties and may not fulfill their contractual obligations to the Fund. Derivatives are also subject to operations risk, the risk that loss will occur as a result of inadequate systems and controls, human error, or otherwise.

Emerging Markets Risk. Investing in issuers located in or tied economically to emerging markets is subject to the same risks as foreign market investments, generally to a greater extent. Emerging markets may have additional risks including greater fluctuations in market values and currency exchange rates; increased risk of default; greater social, economic, and political uncertainty and instability; increased risk of nationalization, expropriation, or other confiscation of assets of issuers to which the Fund may be exposed; increased risk of embargoes or economic sanctions on a country, sector or issuer; greater governmental involvement in the economy; less governmental supervision and regulation of the securities markets and participants in those markets; controls on non-U.S. investment, capital controls and limitations on repatriation of invested capital, dividends, interest and other income and on the Fund's ability to exchange local currencies for U.S. dollars; lower levels of liquidity; inability to purchase and sell investments or otherwise settle security or derivative transactions; greater risk of issues with share registration and safe custody; unavailability of currency hedging techniques; differences in, or lack of, auditing and financial reporting standards and resulting unavailability of material information about issuers; slower clearance and longer settlement; and difficulties in obtaining and/or enforcing legal judgments.

Financial Services Risk. The risk that an investment in issuers in the financial services sector may be adversely affected by, among other things: (i) changes in the regulatory framework or economic conditions that may negatively affect financial service businesses; (ii) exposure of a financial institution to non-diversified or concentrated loan portfolios; (iii) exposure to financial leverage and/or investments or agreements which, under certain circumstances, may lead to losses, for example sub-prime loans; (iv) the risk that a market shock or other unexpected market, economic, political, regulatory, or other event might lead to a sudden decline in the values of most or all companies in the financial services sector; and (v) the interconnectedness or interdependence among financial services companies, including the risk that the financial distress or failure of one financial services company may materially and adversely affect a number of other financial services companies.

Focused Investment Risk. To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund's exposure to various risks may be heightened, including price volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.

Foreign (Non-U.S.) Investment Risk. Investments in securities of foreign companies or governments can be more volatile than investments in U.S. companies or governments. Diplomatic, political, or economic developments, including nationalization or expropriation, could affect investments in foreign countries. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the values of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign companies or governments generally are not subject to uniform accounting, auditing, and financial reporting standards comparable to those applicable to domestic U.S. companies or governments. Transaction costs are generally higher than those in the United States and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities.

Frontier Market Risk. Because frontier markets are among the smallest, least mature and least liquid of the emerging markets, investments in frontier markets generally are subject to a greater risk of loss than investments in developed markets or traditional emerging markets. Frontier market countries have smaller economies, less-developed capital markets, more political and economic instability, weaker legal, financial accounting and regulatory infrastructure, and more governmental limitations on foreign investments than typically found in more developed countries, and frontier markets

PNC EMERGING MARKETS EQUITY FUND

typically have greater market volatility, lower trading volume, lower capital flow, less investor participation, fewer large global companies, and greater risk of a market shutdown than more developed markets. Frontier markets are more prone to economic shocks associated with political and economic risks than are emerging markets generally. Many frontier market countries may be dependent on commodities, foreign trade, or foreign aid.

Growth Investing Risk. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their stock prices are based heavily on future expectations. If the Adviser's assessment of the prospects for a company's growth is wrong, or if the Adviser's judgment of how other investors will value the company's growth is wrong, then the price of the company's stock may fall or not approach the value that the Adviser has placed on it. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of the issuer's bonds and preferred stock generally take precedence over the claims of those who own common stock.

Investment Company Risk. The Fund may invest in shares of other investment companies, including ETFs. To the extent that the Fund invests in shares of another investment company or ETF, investors bear their proportionate share of the expenses of the underlying investment company or ETF. ETFs and closed-end investment companies may trade at a price below their net asset value ("NAV").

Issuer Risk. The value of the Fund's investments may decline for a number of reasons directly related to the issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, in addition to the historical and prospective earnings of the issuer and the value of its assets.

Leverage Risk. Certain transactions may give rise to a form of leverage, including, but not limited to, derivative instruments, certain ETFs, reverse repurchase agreements, loans of portfolio securities and the use of when-issued, delayed-delivery, or forward-commitment transactions. Leveraging may cause the Fund to liquidate portfolio positions to satisfy its obligations at disadvantageous times or prices. Leveraging, including borrowing, may cause the Fund's performance to be more volatile than if the Fund had not been leveraged. Certain types of leveraging transactions could theoretically be subject to unlimited losses.

Limited Operating History Risk. A newly formed Fund has no or a limited operating history for investors to evaluate. A newly formed Fund may not attract sufficient assets to achieve or maximize investment and operational efficiencies and remain viable. If a newly formed Fund fails to achieve sufficient scale, it may be liquidated.

Liquidity Risk. Liquidity risk exists when particular investments are difficult to purchase or sell. Investments in illiquid securities involve the risk that they cannot be disposed of at approximately the value at which the Fund has valued the

securities or at all. The Fund's investments in securities that are or become illiquid may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price.

Management and Operational Risk. The Fund is subject to management risk because it is actively managed. The Adviser will apply investment techniques and risk analysis in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired outcome. Additionally, legislative, regulatory, or tax developments may affect the investment techniques available to the Adviser in managing the Fund and may also adversely affect the ability of the Fund to achieve its investment objective.

Cyber-attacks, disruptions, or failures that affect the Fund's service providers, the Fund's counterparties, market participants, issuers of securities held by the Fund, or the systems or technology on which the Fund may rely, may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations, such as calculating the Fund's NAV or processing redemptions.

Market Risk. Market risk is the risk that securities prices will fall over short or extended periods of time. Historically, the securities markets have moved in cycles, and the value of the Fund's securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may decline in response. In response to governmental actions or intervention, political, economic, or market developments, or other external factors, markets may experience periods of high volatility and reduced liquidity. During those periods, the Fund may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, and potentially at unfavorable prices. Certain securities may be difficult to value during such periods.

Portfolio Turnover Risk. It is anticipated that the Equity Funds that use quantitative strategies will experience high rates of portfolio turnover, which may result in payment by the Fund of above-average transaction costs. High portfolio turnover may involve correspondingly greater transaction costs in the form of dealer spreads or brokerage commissions. It may result in increased realization of net short-term capital gains (which are taxable to shareholders as ordinary income when distributed to them), higher taxable distributions, and lower after-tax performance.

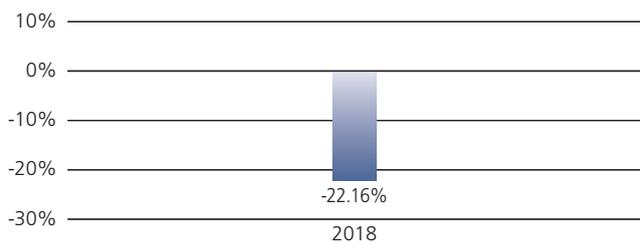

All investments are subject to inherent risks, and an investment in the Fund is no exception. Your investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Accordingly, you may lose money by investing in the Fund.

PNC EMERGING MARKETS EQUITY FUND

PERFORMANCE INFORMATION

Class R6 Shares of the Fund had not commenced operations as of the date of this prospectus. For this reason, the performance information shown below is for another class of shares (Class I Shares) that is not offered in this prospectus but would have substantially similar annual returns because both classes of shares will be invested in the same portfolio of securities. The bar chart and the performance table below provide some indication of the risks of investing in the Fund by showing changes in the performance of the Fund's Class I Shares from year to year and by showing how the average annual returns of the Fund's Class I Shares compare with those of a broad measure of market performance. The performance of Class R6 Shares will also differ due to differences in expenses. As with all mutual funds, the Fund's past performance (before and after taxes) does not predict the Fund's future performance. Updated information on the Fund's performance can be obtained by visiting https://www.pncfunds.com/performance/all/class_i/daily.fs or by calling 1-800-622-FUND (3863).

Calendar Year Total Returns

Best	4.70%	(3/31/18)
Worst	-12.88%	(12/31/18)

	1 Year	Since Inception (03/31/17)
Class I Shares		
Returns Before Taxes	-22.16%	3.65%
Returns After Taxes on Distributions ¹	-22.38%	3.43%
Returns After Taxes on Distributions and Sale of Fund Shares ¹	-12.71%	2.92%
MSCI Emerging Markets Index (returns reflect no deduction for fees or expenses, but are net of withholding tax on dividend reinvestments)	-14.58%	2.95%

¹ After-tax returns are shown for Class I Shares only. After-tax returns for Class R6 Shares will differ. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts. In some cases, returns after taxes on distributions and sale of Fund shares may be higher than returns before taxes because the calculations assume the investor received a tax deduction for any loss incurred on the sale of shares.

MANAGEMENT OF THE FUND

Investment Adviser

PNC Capital Advisors, LLC is the investment adviser to the Fund.

Portfolio Managers

Name	Years as Member of Fund's Portfolio Management Team	Title
Martin C. Schulz	Since the Fund's Inception (2017)	Managing Director
Calvin Y. Zhang	Since the Fund's Inception (2017)	Senior Analyst/Portfolio Manager

IMPORTANT ADDITIONAL INFORMATION

Purchase and Sale of Fund Shares

You may purchase or redeem (sell) Fund shares by phone, mail, wire, or online on each day that the New York Stock Exchange ("NYSE") is open. Shares cannot be purchased by wire transactions on days when banks are closed.

By Phone, Wire, or through a Systematic Plan: contact your financial intermediary or, if you hold your shares directly through the Funds, you should contact PNC Funds by phone at 1-800-622-FUND (3863).

By Mail: write to PNC Funds c/o The Bank of New York Mellon, P.O. Box 9795, Providence, RI 02940-9795.

By Internet: www.pncfunds.com.

Minimum Initial Investments:

- There is no minimum investment amount for Class R6 Shares, except as described in the section of the statutory prospectus entitled "Purchasing, Exchanging, and Redeeming Fund Shares."

Minimum Subsequent Investments:

- For Class R6 Shares, there is no minimum subsequent investment amount.
- For Class R6 Shares, specified plans may establish various minimum investment and account size requirements; ask your plan administrator for more information.

The Fund's initial and subsequent investment minimums may be reduced or waived in some cases.

Tax Information

A Fund's distributions generally will be taxed to you as ordinary income or capital gains if you hold shares in a taxable account. If you are invested in a Fund through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, you generally will not be subject to tax on Fund distributions so long as your Fund shares remain in the arrangement, but you may be taxed upon your withdrawal of monies from the arrangement.

PNC INTERNATIONAL GROWTH FUND

INVESTMENT OBJECTIVE

The Fund seeks to provide long-term capital appreciation.

FUND FEES AND EXPENSES

The following table describes the fees and expenses that you may pay if you buy and hold Fund shares.

Shareholder Fees (fees paid directly from your investment)	
	Class R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None
Maximum Deferred Sales Charge (Load) (as a percentage of net asset value)	None
Redemption Fee	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
	Class R6
Management Fees	0.80%
Distribution (12b-1) Fees	None
Other Expenses ¹	1.87%
Shareholder Servicing Fees	None
Other	1.87%
Acquired Fund Fees and Expenses ²	0.02%
Total Annual Fund Operating Expenses	2.69%
Fee Waiver and Expense Reimbursement ³	1.83%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ³	0.86%

¹ "Other Expenses" are estimated for the current fiscal year. "Other Expenses" include indirect fees and expenses of Acquired Funds that do not exceed 0.01% of the average net assets of the Fund. "Acquired Fund" means any investment company in which the Fund invests or has invested during the period.

² "Acquired Fund" means any investment company in which the Fund invests or has invested during the period. The Total Annual Fund Operating Expenses will not correlate to the Fund's ratio of expenses to average net assets in the Fund's Financial Highlights, which reflects the operating expenses of the Fund and does not include "Acquired Fund Fees and Expenses."

³ PNC Capital Advisors, LLC (the "Adviser") has contractually agreed to waive Management Fees and reimburse or pay certain operating expenses for the Fund to the extent the Fund's Total Annual Fund Operating Expenses exceed 0.84% for Class R6 Shares, excluding certain expenses such as extraordinary expenses, acquired fund fees and expenses, taxes, brokerage commissions, dealer and underwriter spreads, commitment fees on leverage facilities, prime broker fees and expenses, interest expense, and dividend expenses related to short sales. This expense limitation continues through January 31, 2020, at which time the Adviser will determine whether to renew, revise, or discontinue it, except that it may be terminated by the Board of Trustees of PNC Funds (the "Board") at any time. The Adviser can be reimbursed by the Fund for any contractual fee reductions or expense reimbursements if reimbursement to the Adviser (a) occurs within the three years following the year in which the Fund accrues a liability or recognizes a contingent liability with respect to such amounts paid, waived, or reimbursed by the Adviser and (b) does not cause the Total Annual Fund Operating Expenses of a class to exceed the percentage expense limitation that was in effect (i) at the time the Adviser paid, waived or reimbursed the amount being repaid by the Fund or (ii) at the time of the reimbursement by the Fund. Any recoupment of fees waived or expenses reimbursed would be subject to the terms of any expense limitation agreement in place at the time of the recoupment.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in Class R6 Shares of the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same, except that the Fee Waiver and Expense Reimbursement is reflected only in the one-year period below. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class R6 Shares	\$88	\$661	\$1,261	\$2,887

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 64% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund primarily invests in a portfolio of equity securities that is tied economically to a number of countries throughout the world, typically three or more. The Fund has broad discretion to invest in equity securities of any market capitalization and issuers located or doing business throughout the world, including in both developed and developing or emerging markets. However, the Fund principally invests in companies with a market capitalization in excess of \$500 million, and the Fund does not expect to make additional investments in developing or emerging markets if it would cause the Fund to have a greater than 10% overweight to developing or emerging markets as compared to the exposure of the MSCI ACWI ex USA Growth Index to such markets. The Fund may make significant investments (e.g., more than 25% of the Fund's portfolio) in issuers located or doing business in a single country.

The Fund's investments in equity securities may include, for example, common stocks, American Depositary Receipts or other U.S. listings of foreign common stocks, and exchange-traded funds ("ETFs").

The Fund may use ETFs, closed-end funds, and derivative instruments to gain broad exposure to markets and/or a particular index. Derivative instruments include, but are not

limited to, options, swaps, forward currency contracts, futures, and options on futures. Although the Fund may invest in derivatives of any kind, it expects to use futures contracts, forward currency contracts, and options on futures contracts for the purpose of managing exposure to the securities markets or to movements in interest rates or currency values. The Fund may also use futures to gain diversified exposure to a specific country or region. These instruments are not used for the purpose of introducing leverage in the Fund, though they may have that result. The Fund may use derivatives as a substitute for taking a position in an underlying asset, to increase returns, to manage risk, or as part of a hedging strategy.

PNC Capital Advisors, LLC's (the "Adviser") investment process seeks to identify companies with robust and sustainable growth rates, high-quality balance sheets, and management teams with clearly defined growth strategies. In allocating the Fund's assets, the Adviser also incorporates information on the economic and financial market conditions within each country. The Adviser's portfolio construction process seeks to combine the best investment candidates within the Adviser's recommended framework of country allocations.

The Fund utilizes an active trading approach. The Adviser may choose to sell a holding when, for example, in the Adviser's view, it no longer represents an attractive investment or to take advantage of what it considers to be a better investment opportunity.

PRINCIPAL RISKS

Active Trading Risk. To the extent that the Fund buys and sells securities actively, it could have higher expenses (which reduce return for shareholders) and higher taxable distributions.

Capitalization Risk. Small-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. Therefore, small-cap stocks may be more volatile than those of larger companies and may have less liquidity, which can reduce their selling prices. Mid-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. As a result, the values of mid-cap-company stocks may be more volatile than those of larger companies.

Country Risk. Significant investment in a particular country will make the Fund's performance more dependent upon the political, economic, and other circumstances relevant to that country than a mutual fund more widely diversified among issuers in different countries.

Currency Risk. To the extent that the Fund invests directly in foreign currencies or in securities that are denominated in, trade in, and pay revenues in, foreign currencies, or derivatives that provide exposure to foreign currencies, the Fund will be exposed to the risk that the currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the hedged currency. Currency exchange rates in foreign countries may

fluctuate significantly over short or long periods of time due to changes in interest rates, intervention (or lack thereof) by governments, central banks, or supranational entities, such as the International Monetary Fund, or the imposition of currency controls or other political or economic developments. As a result, the Fund's investments in foreign currency-denominated securities may reduce the returns of the Fund. Currency risk may be especially high if the Fund invests in foreign currencies or engages in foreign currency transactions that are economically tied to emerging or frontier market countries, which may give rise to market, credit, currency, liquidity, legal, political, and other risks different from, or greater than, the risks of investing in developed foreign currencies or engaging in foreign currency transactions that are economically tied to developed foreign countries.

Derivatives Risk. Derivatives are financial instruments whose values depend upon, or are derived from, the value of a reference asset, such as one or more underlying assets, indexes, or currencies and may include, but are not limited to, options, swaps, forward currency contracts, futures, and options on futures. A small investment in derivatives could have a potentially large impact on the Fund's performance. The use of derivatives involves risks different from those associated with investing directly in the reference asset. Derivatives can be volatile, illiquid, and difficult to value, and an imperfect correlation may exist between changes in the value of a derivative held by the Fund and the value of the reference asset. Generally speaking, some derivatives are "leveraged" and therefore may magnify or otherwise increase investment losses to the Fund. A small investment in derivatives can have a significant impact on the Fund's exposure to, among other things, securities' market values, interest rates, or currency exchange rates. The Fund's use of derivatives may also affect the amount, timing or character of distributions payable to, and thus taxes payable by, shareholders. In addition, there is also the risk that the Fund may be unable to terminate or sell a derivatives position. There is also the risk that derivative counterparties may suffer financial difficulties and may not fulfill their contractual obligations to the Fund. Derivatives are also subject to operations risk, the risk that loss will occur as a result of inadequate systems and controls, human error, or otherwise.

Emerging Markets Risk. Investing in issuers located in or tied economically to emerging markets is subject to the same risks as foreign market investments, generally to a greater extent. Emerging markets may have additional risks including greater fluctuations in market values and currency exchange rates; increased risk of default; greater social, economic, and political uncertainty and instability; increased risk of nationalization, expropriation, or other confiscation of assets of issuers to which the Fund may be exposed; increased risk of embargoes or economic sanctions on a country, sector or issuer; greater governmental involvement in the economy; less governmental supervision and regulation of the securities markets and

PNC INTERNATIONAL GROWTH FUND

participants in those markets; controls on non-U.S. investment, capital controls and limitations on repatriation of invested capital, dividends, interest and other income and on the Fund's ability to exchange local currencies for U.S. dollars; lower levels of liquidity; inability to purchase and sell investments or otherwise settle security or derivative transactions; greater risk of issues with share registration and safe custody; unavailability of currency hedging techniques; differences in, or lack of, auditing and financial reporting standards and resulting unavailability of material information about issuers; slower clearance and longer settlement; and difficulties in obtaining and/or enforcing legal judgments.

Focused Investment Risk. To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund's exposure to various risks may be heightened, including price volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.

Foreign (Non-U.S.) Investment Risk. Investments in securities of foreign companies or governments can be more volatile than investments in U.S. companies or governments. Diplomatic, political, or economic developments, including nationalization or expropriation, could affect investments in foreign countries. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the values of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign companies or governments generally are not subject to uniform accounting, auditing, and financial reporting standards comparable to those applicable to domestic U.S. companies or governments. Transaction costs are generally higher than those in the United States and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities.

Growth Investing Risk. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their stock prices are based heavily on future expectations. If the Adviser's assessment of the prospects for a company's growth is wrong, or if the Adviser's judgment of how other investors will value the company's growth is wrong, then the price of the company's stock may fall or not approach the value that the Adviser has placed on it. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of the issuer's bonds and preferred stock generally take precedence over the claims of those who own common stock.

Investment Company Risk. The Fund may invest in shares of other investment companies, including ETFs. To the extent that the Fund invests in shares of another investment company

or ETF, investors bear their proportionate share of the expenses of the underlying investment company or ETF. ETFs and closed-end investment companies may trade at a price below their net asset value ("NAV").

Issuer Risk. The value of the Fund's investments may decline for a number of reasons directly related to the issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, in addition to the historical and prospective earnings of the issuer and the value of its assets.

Limited Operating History Risk. A newly formed Fund has no or a limited operating history for investors to evaluate. A newly formed Fund may not attract sufficient assets to achieve or maximize investment and operational efficiencies and remain viable. If a newly formed Fund fails to achieve sufficient scale, it may be liquidated.

Management and Operational Risk. The Fund is subject to management risk because it is actively managed. The Adviser will apply investment techniques and risk analysis in making investment decisions for the Fund, but there can be no guarantee that these decisions will produce the desired outcome. Additionally, legislative, regulatory, or tax developments may affect the investment techniques available to the Adviser in managing the Fund and may also adversely affect the ability of the Fund to achieve its investment objective.

Cyber-attacks, disruptions, or failures that affect the Fund's service providers, the Fund's counterparties, market participants, issuers of securities held by the Fund, or the systems or technology on which the Fund may rely, may adversely affect the Fund and its shareholders, including by causing losses for the Fund or impairing Fund operations, such as calculating the Fund's NAV or processing redemptions.

Market Risk. Market risk is the risk that securities prices will fall over short or extended periods of time. Historically, the securities markets have moved in cycles, and the value of the Fund's securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may decline in response. In response to governmental actions or intervention, political, economic, or market developments, or other external factors, markets may experience periods of high volatility and reduced liquidity. During those periods, the Fund may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, and potentially at unfavorable prices. Certain securities may be difficult to value during such periods.

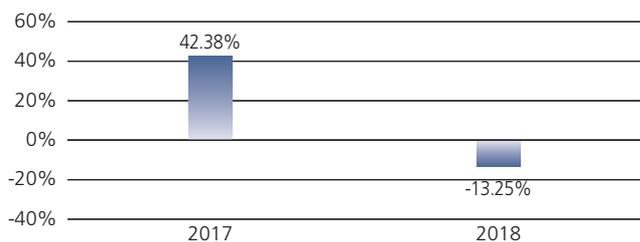

All investments are subject to inherent risks, and an investment in the Fund is no exception. Your investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Accordingly, you may lose money by investing in the Fund.

PNC INTERNATIONAL GROWTH FUND

PERFORMANCE INFORMATION

Class R6 Shares of the Fund had not commenced operations as of the date of this prospectus. For this reason, the performance information shown below is for another class of shares (Class I Shares) that is not offered in this prospectus but would have substantially similar annual returns because both classes of shares will be invested in the same portfolio of securities. The bar chart and the performance table below provide some indication of the risks of investing in the Fund by showing changes in the performance of the Fund's Class I Shares from year to year and by showing how the average annual returns of the Fund's Class I Shares compare with those of one or more broad measures of market performance. The performance of Class R6 Shares will also differ from that of Class I Shares due to differences in expenses. As with all mutual funds, the Fund's past performance (before and after taxes) does not predict the Fund's future performance. Updated information on the Fund's performance can be obtained by visiting https://www.pncfunds.com/performance/all/class_i/daily.fs or by calling 1-800-622-FUND (3863).

Calendar Year Total Returns

Best Quarter	10.98%	(3/31/17)
Worst Quarter	-15.66%	(12/31/18)

	1 Year	Since Inception (02/29/16)
Class I Shares		
Returns Before Taxes	-13.25%	8.87%
Returns After Taxes on Distributions ¹	-16.06%	7.47%
Returns After Taxes on Distributions and Sale of Fund Shares ¹	-5.72%	6.97%
MSCI ACWI ex USA Growth Index (returns reflect no deduction for fees or expenses, but are net of withholding tax on dividend reinvestments)	-14.43%	7.30%

¹ After-tax returns are shown for Class I Shares only. After-tax returns for Class R6 Shares will differ. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-advantaged arrangements, such as 401(k) plans or individual retirement accounts. In some cases, returns after taxes on distributions and sale of Fund shares may be higher than returns before taxes because the calculations assume the investor received a tax deduction for any loss incurred on the sale of shares.

MANAGEMENT OF THE FUND

Adviser

PNC Capital Advisors, LLC is the investment adviser to the Fund.

Portfolio Managers

Name	Years as Member of Fund's Portfolio Management Team	Title
Martin C. Schulz	2	Managing Director
Calvin Y. Zhang	2	Senior Analyst/Portfolio Manager

IMPORTANT ADDITIONAL INFORMATION

Purchase and Sale of Fund Shares

You may purchase or redeem (sell) Fund shares by phone, mail, wire, or online on each day that the New York Stock Exchange ("NYSE") is open. Shares cannot be purchased by wire transactions on days when banks are closed.

By Phone, Wire, or through a Systematic Plan: contact your financial intermediary or, if you hold your shares directly through the Funds, you should contact PNC Funds by phone at 1-800-622-FUND (3863).

By Mail: write to PNC Funds c/o The Bank of New York Mellon, P.O. Box 9795, Providence, RI 02940-9795.

By Internet: www.pncfunds.com.

Minimum Initial Investments:

- There is no minimum investment amount for Class R6 Shares, except as described in the section of the statutory prospectus entitled "Purchasing, Exchanging, and Redeeming Fund Shares."

Minimum Subsequent Investments:

- For Class R6 Shares, there is no minimum subsequent investment amount.
- For Class R6 Shares, specified plans may establish various minimum investment and account size requirements; ask your plan administrator for more information.

The Fund's initial and subsequent investment minimums may be reduced or waived in some cases.

Tax Information

A Fund's distributions generally will be taxed to you as ordinary income or capital gains if you hold shares in a taxable account. If you are invested in a Fund through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account, you generally will not be subject to tax on Fund distributions so long as your Fund shares remain in the arrangement, but you may be taxed upon your withdrawal of monies from the arrangement.

DETAILS ABOUT THE FUNDS

Understanding the Information Presented in this Prospectus

Performance. Performance results shown in this prospectus, including the Summary Prospectus, may include the effects of previous expense reduction arrangements or fee waivers in effect during previous periods. The performance results shown would have been lower absent the effect of the expense reduction arrangements and fee waivers.

Expenses. Unless otherwise noted, the expense information shown is based on expenses incurred during a Fund's most recently completed fiscal year, expressed as a percentage of the Fund's average daily net assets over that period. Because a Fund's asset size changes daily in response to market volatility and purchase and redemption activity, the expense information shown has not been adjusted to reflect each Fund's current asset size. A Fund's annual operating expenses and its asset size will likely vary over time and may vary materially. In general, a Fund's annual operating expenses will increase as the Fund's assets decrease and decrease as the Fund's assets increase.

Regulation. The Adviser is a wholly owned subsidiary of PNC Bank, National Association ("PNC Bank"). Certain regulatory requirements impose investment and other restrictions that apply to a bank, such as PNC Bank, and some of its affiliated persons when they manage the investments of others, including restrictions that limit the ability to invest in certain affiliates of the bank and other types of issuers. These restrictions, as well as PNC Bank and Adviser-adopted policies and procedures, may be applied to holdings of the PNC Funds and holdings of customers of certain related investment advisers and may restrict the Adviser's ability to invest in or engage in transactions with certain issuers of equity securities, fixed income securities and other investments. These restrictions may limit a Fund portfolio manager's ability to make certain investments the portfolio manager might otherwise select and may adversely affect a Fund's performance.

More Information About Investment Objectives and Principal Investment Strategies

Each Fund has its own investment objective and strategies for reaching that objective as discussed in the Summary Sections of this prospectus. The investment objective of each Fund may be changed at any time without shareholder approval. The Adviser invests Fund assets in a way that it believes will help each Fund achieve its objective. Investing in each Fund involves risk and there is no guarantee that a Fund will achieve its objective. The value of a Fund's shares will fluctuate over time and your shares, when redeemed, may be worth less than when you purchased them. The Adviser's judgment about the

markets, the economy, or companies may not anticipate actual market movements, economic conditions, or company performance, and these judgments may affect the return on your investment.

This section provides additional information about the principal investment strategies utilized by the Funds. For temporary defensive purposes, during unusual economic, market, political or other conditions, each Fund may invest up to 100% of its assets in short-term, high-quality debt instruments and money market instruments. These instruments would not ordinarily be consistent with a Fund's principal investment strategies, and may prevent a Fund from achieving its investment objective.

A Fund with a policy requiring it to invest at least 80% of its net assets in particular types of securities also may temporarily deviate from such policy in certain limited, appropriate circumstances, such as during periods of unusually large cash inflows or redemptions, or the temporary unavailability of a sufficient supply of such securities. The 80% investment requirement generally applies at the time a Fund purchases securities. In the event a Fund no longer meets its 80% requirement (for example, as a result of changes in the value of its portfolio holdings or other circumstances beyond its control), the Fund will make future investments in a manner that would bring the Fund into compliance with its 80% requirement.

In fulfilling the 80% investment requirement referred to above, a Fund may include in the computation the notional value of synthetic instruments with economic characteristics similar to the types of securities subject to the requirement, such as ETFs, derivatives, or futures contracts. These instruments may carry greater risk than other types of securities in which the Funds invest. For more information on derivatives and futures contracts and their related risks, see the Statement of Additional Information.

PNC Emerging Markets Equity Fund

The Fund seeks to provide long-term capital appreciation. The Fund's investment objective may be changed without shareholder approval.

Under normal circumstances, the Fund invests at least 80% of its net assets plus any borrowings for investment purposes in equity securities of issuers tied economically to emerging market countries ("emerging market issuers"). Emerging market issuers include companies meeting one or more of the following criteria: (i) the principal trading market for the issuer's securities is in an emerging market country; (ii) the issuer derives at least 50% of its total revenue or profit from goods produced or sold and investments made or services performed in emerging market countries; (iii) the issuer has at least 50% of its assets in emerging market countries; or (iv) the company is organized under the laws of, or has a principal office in, an emerging market country. Emerging market

countries include any country represented in any widely recognized index of emerging market or frontier market securities, such as the MSCI Emerging Markets Index, MSCI ACWI ex USA Index, and the MSCI Frontier Markets Index. Emerging markets include most countries in the world other than Australia, Canada, Japan, New Zealand, the United Kingdom, the United States, most of the countries of Western Europe, and Hong Kong. “Frontier markets” refers to the markets of smaller, less accessible, but still investable, countries of the developing world.

The Fund may make significant investments in issuers located or doing business in a single country or geographic region. The Fund may invest in securities across all market capitalizations and the Fund may invest a significant portion of its assets in companies of any one particular market capitalization category.

The Adviser’s investment process seeks to identify companies with robust and sustainable growth rates, high-quality balance sheets, and management teams with clearly defined growth strategies. In allocating the Fund’s assets across geographies, the Adviser uses its proprietary, multi-factor country allocation model to identify and score countries based on factors such as the economic and financial market conditions within each country, specifically economic growth projections, stock market valuation, risk position, and stock market momentum. Next, the Adviser applies a bottom-up security selection screen, which scores all stocks with a particular market capitalization based on growth, profitability and momentum factors, to yield a pool of securities for further fundamental analysis and review. The Adviser’s portfolio construction process seeks to combine the best investment candidates within the Adviser’s recommended framework of country allocations and security selections.

The Fund may invest in securities denominated in any currency, including U.S. dollars, other developed market currencies, such as the euro, yen, and pound sterling, and the currencies of the emerging markets in which the Fund may invest. The Fund typically does not seek to limit its foreign currency exposure, but the Adviser may determine in its discretion to seek to hedge some of its currency exposures back to the U.S. dollar. For example, the Fund may utilize currency forwards to seek to reduce the effect of changes in currency exchange rates on the Fund’s performance, where practical. The Fund may also use exchange-traded futures for the efficient management of cash flows and to gain exposure to the asset classes discussed above.

The Fund’s investment strategy may involve, at times, investing a significant portion of its assets in one or more industries or sectors that the Adviser believes hold high potential. To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund’s exposure to various risks may be heightened, including price

volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.

The Fund’s investments in equity securities may include, for example, common and preferred stocks, American Depositary Receipts (“ADRs”) and Global Depositary Receipts, other U.S. listings of foreign common stocks, and exchange-traded funds (“ETFs”). The Fund may also invest in fixed income securities of any credit quality or duration, including bonds rated below investment grade (commonly referred to as “junk” bonds), warrants and rights, participation notes or other structured products. The Fund may use ETFs, closed-end funds, and derivative instruments to gain exposure to markets, a particular index, or a particular issuer or security.

Derivative instruments in which the Fund may invest include, but are not limited to, swaps, forward currency contracts, futures, and structured notes. The Fund may use derivatives as a substitute for taking a position in an underlying asset, to increase returns, to manage risk, or as part of a hedging strategy. Although the Fund may invest in derivatives of any kind, it expects to use futures contracts, forward currency contracts, and options on futures contracts for the purpose of managing exposure to the securities markets or to movements in interest rates or currency values. The Fund may also use futures to gain exposure to a specific country, region, index or issuer. These instruments are not typically used for the purpose of introducing leverage in the Fund, though they may have that result.

The Fund utilizes an active trading approach.

The Fund will provide shareholders with at least 60 days’ written notice before changing its 80% policy discussed above.

PNC International Growth Fund

The Fund seeks to provide long-term capital appreciation. The Fund’s investment objective may be changed without shareholder approval.

The Fund primarily invests in a portfolio of equity securities that is tied economically to a number of countries throughout the world, typically three or more. The Fund has broad discretion to invest in equity securities of any market capitalization and issuers located or doing business throughout the world, including in both developed and developing or emerging markets. However, the Fund principally invests in companies with a market capitalization in excess of \$500 million, and the Fund does not expect to make additional investments in developing or emerging markets if it would cause the Fund to have a greater than 10% overweight to developing or emerging markets as compared to the exposure of the MSCI ACWI ex USA Growth Index to such markets. The Fund may make significant investments (e.g., more than 25% of the Fund’s portfolio) in issuers located or doing business in a single country. As of December 31, 2017,

developing and emerging market issuers constituted approximately 75.57% and 24.43%, respectively, of the MSCI ACWI ex USA Growth Index. This percentage will fluctuate over time and may fluctuate significantly over a short period of time. The Fund's investments in equity securities may include, for example, common stocks, American Depositary Receipts or other U.S. listings of foreign common stocks, and ETFs. The Fund may use ETFs, closed-end funds and derivative instruments to gain broad exposure to markets and/or a particular index. Derivative instruments include, but are not limited to, options, swaps, forward currency contracts, futures and options on futures. Although the Fund may invest in derivatives of any kind, it expects to use futures contracts, forward currency contracts, and options on futures contracts for the purpose of managing exposure to the securities markets or to movements in interest rates or currency values. The Fund may also use futures to gain diversified exposure to a specific country or region. These instruments are not used for the purpose of introducing leverage in the Fund, though they may have that result. The Fund may use derivatives as a substitute for taking a position in an underlying asset, to increase returns, to manage risk, or as part of a hedging strategy. The Adviser's investment process seeks to identify companies with robust and sustainable growth rates, high-quality balance sheets, and management teams with clearly defined growth strategies. In allocating the Fund's assets, the Adviser also incorporates information on the economic and financial market conditions within each country. The Adviser's portfolio construction process seeks to combine the best investment candidates within the Adviser's recommended framework of country allocations.

The Fund utilizes an active trading approach. The Adviser may choose to sell a holding when, for example, in the Adviser's view, it no longer represents an attractive investment or to take advantage of what it considers to be a better investment opportunity.

Additional Information Regarding the Funds' Investment Policies

Additional investment policies are described in this section. Each Fund also may invest in other securities, use other strategies, and engage in other investment practices. See the Statement of Additional Information for more detail on the investment policies of the Funds.

Securities Lending

Each Fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, a Fund will receive collateral from the borrower equal to at least 102% of the market value of the domestic securities loaned and 105% of the market value of the international securities loaned. Should the borrower of the securities fail financially, a Fund may experience losses and/or delays in recovering the loaned securities or exercising its rights in the

collateral. The Fund bears the risk of loss on any collateral it invests.

Illiquid Securities

Each Fund may invest up to 15% of its net assets in illiquid securities. Illiquid securities involve the risk that they cannot be disposed of at approximately the value at which the Fund has valued the securities or at all. Liquid investments made by the Funds may become illiquid after their purchase by the Funds, potentially rapidly and unexpectedly. The Adviser's determination that an investment should be treated as liquid for purposes of this policy provides no assurance that the investment will not become illiquid at a later time or that the investment will be sold at or near the price at which the Fund has valued the investment. Restricted securities are a type of security that may only be resold to certain eligible qualified buyers and may be considered illiquid. From time to time, a Fund may determine, pursuant to procedures adopted by the Funds' Board, that particular restricted securities are not illiquid, and those securities may then be purchased by a Fund without limit.

Repurchase Agreements

Each Fund may enter into repurchase agreements. A repurchase agreement is a contract under which a Fund acquires a security (e.g., a security backed by the full faith and credit of the U.S. government, such as a U.S. Treasury bill, bond, or note) for a relatively short period for cash and subject to the commitment of the seller to repurchase the security for an agreed-upon price on a specified date. The repurchase price exceeds the acquisition price and reflects an agreed-upon market rate unrelated to the coupon rate on the purchased security. Repurchase agreements afford a Fund the opportunity to earn a return on temporarily available cash with limited market risk, although the Fund bears the risk of a seller's failure to meet its obligation to pay the repurchase price when it is required to do so. Such a default may subject a Fund to expenses, delays, and risks of loss including: (i) possible declines in the value of the underlying security while the Fund seeks to enforce its rights thereto, (ii) possible reduced levels of income and lack of access to income during this period, and (iii) the inability to enforce its rights as to the security and the expenses involved in attempted enforcement. Entering into repurchase agreements entails certain risks, which include the risk that the counterparty to the repurchase agreement may not be able to fulfill its obligations, as discussed above, that the parties may disagree as to the meaning or application of contractual terms, or that the instrument may not perform as expected.

Foreign Securities

Each Fund may invest in foreign securities. Such securities may or may not be listed on foreign stock exchanges and may include equity securities and debt securities (e.g., convertible

bonds) of foreign entities and obligations of foreign branches of U.S. banks and of foreign banks. Investments in foreign securities involve certain inherent risks, such as risks specific to the country of issue, foreign currencies, the availability of information and differing regulatory regimes. For more information, please see “Foreign (Non-U.S.) Investment Risk” in the “More Information About Principal Risks” section of this prospectus.

Cash Management

Pursuant to U.S. Securities and Exchange Commission (“SEC”) rules, the Funds may invest cash balances not otherwise invested in portfolio securities and cash collateral from securities lending programs to purchase shares of the money market funds offered by PNC Funds (“Affiliated Money Market Funds”), and other investment companies. The Funds bear the costs and fees associated with investments in other investment companies, including other investment companies managed by the Adviser or its affiliates, except that the Adviser has agreed to waive its advisory fee in an amount equal to the advisory fees paid to the Adviser by an Affiliated Money Market Fund with respect to a Fund’s short-term cash reserves invested in an Affiliated Money Market Fund. Certain other contractual and voluntary advisory fee waivers may reduce the Adviser’s obligation to waive its advisory fees in connection with such investments. This waiver does not apply to cash collateral from a Fund’s securities lending program invested in an Affiliated Money Market Fund, and the waiver may be terminated at any time without prior notice. Because the Adviser and/or its affiliates receive fees for providing services to PNC Funds and certain other funds in which the Funds may invest, the Funds’ investments in such funds benefit the Adviser and/or the Adviser’s affiliates.

Convertible Securities

Each Fund may invest in convertible securities, which have characteristics of both fixed income and equity securities. Convertible securities entitle the holder to receive interest paid or accrued on debt or the dividend paid on preferred stock until the securities mature or are redeemed, converted or exchanged. Prior to conversion, convertible securities have characteristics similar to ordinary debt securities in that they normally provide a stream of income with generally higher yields than those of common stock of the same or similar issuers. The value of a convertible security tends to move with the market value of underlying stock, but may also be affected by interest rates, the credit quality of the issuer and any call provisions.

Industries and Sectors

A Fund’s investment strategy may involve, at times, investing a significant portion of its assets in one or more industries or sectors. To the extent that a Fund focuses its investments in

the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund’s exposure to various risks may be heightened, including price volatility and adverse economic, market, political or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class. See “More Information About Principal Risks – Focused Investment Risk” in this prospectus for a discussion of the risks associated with investing significantly in one or more industries or sectors.

Notes on Investment Limitations

Each Fund has adopted policies or restrictions that set, for example, minimum and maximum percentages of its assets to be allocated to certain types of investments. Unless otherwise indicated, all limitations apply only at the time an investment is made and shall not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of such investment. For example, a change in the value of an investment or its credit rating after it is acquired does not create a violation of any policy to limit a Fund’s investment to a certain percentage of assets or in issuers of a certain credit quality. When an investment is rated by more than one Nationally Recognized Statistical Rating Organization, the Adviser will utilize the highest rating for that security for purposes of applying any investment policies that incorporate credit ratings (e.g., a policy to invest a certain percentage of a Fund’s assets in securities rated investment grade) except where a Fund has a policy to invest a certain percentage of its assets in securities that are rated below investment grade, in which case the Fund will utilize the lowest rating that applies to that investment.

MORE INFORMATION ABOUT PRINCIPAL RISKS

The Adviser evaluates the risks and rewards presented by all securities purchased by a Fund and how they advance the Fund’s investment objective. It is possible, however, that these evaluations will prove to be inaccurate. No matter how well an investment manager does in performing and executing on its assessments, you could lose money on your investment in a Fund, just as you could with other investments.

The value of your investment in a Fund is based primarily on the market prices of the securities the Fund holds. These prices change daily due to economic and other events that affect particular companies and other issuers. These price movements, sometimes called volatility, may be greater or lesser depending on the types of securities a Fund owns and the markets in which it trades. The effect on a Fund of a change in the value of a single security will depend on, among other things, how widely the Fund diversifies its holdings.

This section provides additional information about the principal risks of investing in the Funds.

Active Trading Risk. To the extent that the Fund buys and sells securities actively, it could have higher expenses (which reduce return for shareholders) and higher taxable distributions. Investment models, such as quantitative and algorithmic models, may prove to be unsuccessful and may not perform as expected for a variety of reasons. For example, human judgment plays a role in building, utilizing, testing, and modifying the financial algorithms and formulas used in these models. In addition, the data, which is typically supplied by third parties, can be imprecise or become stale due to new events or changing circumstances. The success of models or factor-driven processes that are predictive in nature is dependent largely upon the accuracy, predictive value and reliability of the supplied data, including historical data. Certain low probability events or factors that are assigned little weight may occur or prove to be more likely or more relevant than expected, for short or extended periods of time. Market performance can be affected by non-quantitative factors (for example, investor fear or over-reaction or other emotional considerations) that are not easily integrated into quantitative analysis. Investment models also involve the risk that construction and implementation (including, for example, data problems, and/or software issues) may create errors or limitations that might go undetected or are discovered only after the errors or limitations have adversely impacted the Fund. Investment models may use simplifying assumptions that can limit their effectiveness.

Capitalization Risk. Small-capitalization companies may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, these small companies may have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, small-cap stocks may be more volatile than those of larger companies and may have less liquidity. These securities may be traded over the counter or listed on an exchange. It may be harder to sell the smallest-capitalization company stocks, which can reduce their selling prices. Mid-capitalization companies may be more vulnerable to adverse business or economic events than larger, more

established companies. As a result, the values of mid-cap company stocks may be more volatile than those of larger companies.

Country Risk. From time to time, the Fund may invest a substantial amount of its assets in issuers located in a single country or a limited number of countries. If the Fund concentrates its investments in this manner, it assumes the risk that economic, political and social conditions in those countries will have a significant impact on its investment performance. The Fund's investment performance may also be more volatile if it concentrates its investments in certain countries, especially emerging-market countries.

Currency Risk. To the extent that a Fund invests directly in foreign currencies or in securities that are denominated in, trade in, and pay revenues in, foreign currencies, or derivatives that provide exposure to foreign currencies, the Fund will be exposed to the risk that the currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the hedged currency.

Currency exchange rates in foreign countries may fluctuate significantly over short or long periods of time due to changes in interest rates, intervention (or lack thereof) by governments, central banks, or supranational entities, such as the International Monetary Fund, or the imposition of currency controls or other political or economic developments. As a result, a Fund's investments in foreign currency-denominated securities may reduce the returns of the Fund. Currency risk may be especially high if a Fund invests in foreign currencies or engages in foreign currency transactions that are economically tied to emerging or frontier market countries, which may give rise to market, credit, currency, liquidity, legal, political, and other risks different from, or greater than, the risks of investing in developed foreign currencies or engaging in foreign currency transactions that are economically tied to developed foreign countries.

Derivatives Risk. Derivative instruments include, but are not limited to, options, swaps, forward currency contracts, futures,

and options on futures. Derivatives are financial instruments whose values depend upon, or are derived from, the value of a reference asset, such as one or more underlying assets, indexes or currencies. A small investment in derivatives could have a potentially large impact on a Fund's performance. The use of derivatives involves risks different from those associated with investing directly in the reference asset. Derivatives can be volatile, illiquid, and difficult to value, and an imperfect correlation may exist between changes in the value of a derivative held by the Fund and the value of the reference asset. In addition, there is also the risk that a Fund may be unable to terminate or sell a derivatives position. Certain Funds may engage in a variety of transactions using "derivatives," such as futures, options, forward currency contracts, warrants, and swaps. The successful use of derivatives requires sophisticated management, and to the extent that derivatives are used, a Fund will depend on the Adviser's ability to analyze and manage derivatives transactions. The prices of derivatives may move in unexpected ways, especially in abnormal market conditions. Generally speaking, some derivatives are "leveraged" and therefore may magnify or otherwise increase investment losses to a Fund, as even a small investment in derivatives can have a significant impact on the Fund's exposure to, among other things, securities' market values, interest rates, or currency exchange rates. A Fund's use of derivatives may also affect the amount, timing or character of distributions payable to, and thus taxes payable by, shareholders. If a Fund enters into a derivatives transaction as a substitute for taking a position in an underlying asset, the Fund is subject to the risk that the derivatives transaction may not provide a return that corresponds with the reference asset. Derivatives are also subject to operations risk, the risk that loss will occur as a result of inadequate systems and controls, human error, or otherwise.

Other risks arise from the potential inability to terminate or sell derivatives positions. A liquid secondary market may not always exist for a Fund's derivatives positions at any time. In fact, many over-the-counter derivative instruments will not have liquidity beyond the counterparty to the instrument. Over-the-counter derivative instruments also involve the risk that derivative counterparties may suffer financial difficulties and may not fulfill their contractual obligations to a Fund.

Some types of cleared derivatives are required to be executed on an exchange or on a swap execution facility. A swap execution facility is a trading platform where multiple market participants can execute derivatives by accepting bids and offers made by multiple other participants in the platform. While this execution requirement is designed to increase transparency and liquidity in the cleared derivatives market, trading on a swap execution facility can create additional costs and risks for the Funds. For example, swap execution facilities typically charge fees, and if a Fund executes derivatives on a swap execution facility through a broker intermediary, the

intermediary may impose fees as well. Also, a Fund may be required to indemnify a swap execution facility, or a broker intermediary who executes cleared derivatives on a swap execution facility on the Fund's behalf, against any losses or costs that may be incurred as a result of the Fund's transactions on the swap execution facility.

If a Fund sells protection on credit default swaps relating to debt securities, the Fund would be required to pay the par (or other agreed-upon) value of a referenced debt security to the counterparty in the event of a default by a third party, the debt security issuer, or the debt security. In return, the Fund would receive from the counterparty a periodic stream of payments over the term of the contract provided that no event of default had occurred. If no default occurred, the Fund would keep the stream of payments. Writing credit default swaps effectively adds leverage to a Fund's portfolio because, in addition to its net assets, the Fund would be subject to investment exposure on the notional amount of the swap.

The regulation of the derivatives markets has increased over the past several years, and additional future regulation of the derivatives markets may make derivatives more costly, may limit the availability or liquidity of derivatives, or may otherwise adversely affect the value or performance of derivatives. Any such adverse developments could impair the effectiveness of a Fund's derivatives transactions and cause a Fund to lose value. For instance, in December 2015, the SEC proposed new regulations applicable to a mutual fund's use of derivatives and related instruments. If adopted as proposed, these regulations could significantly limit or impact a Fund's ability to invest in derivatives and other instruments, limit a Fund's ability to employ certain strategies that use derivatives, and adversely affect a Fund's performance, efficiency in implementing its strategy, liquidity, and ability to pursue its investment objective.

Emerging Markets Risk. Investing in issuers located in or tied economically to emerging markets is subject to the same risks as foreign market investments, generally to a greater extent. Emerging markets may have additional risks including greater fluctuations in market values and currency exchange rates; increased risk of default (by both government and private issuers); greater social, economic, and political uncertainty and instability (including the risk of war or natural disaster); increased risk of nationalization, expropriation, or other confiscation of assets of issuers to which the Fund may be exposed; increased risk of embargoes or economic sanctions on a country, sector or issuer; greater governmental involvement in the economy; less governmental supervision and regulation of the securities markets and participants in those markets; controls on non-U.S. investment, capital controls and limitations on repatriation of invested capital, dividends, interest and other income and on the Fund's ability to exchange local currencies for U.S. dollars; lower levels of liquidity; inability to purchase and sell investments or otherwise settle security or derivative transactions

(i.e., a market freeze); greater risk of issues with share registration and safe custody; unavailability of currency hedging techniques; differences in, or lack of, auditing and financial reporting standards and resulting unavailability of material information about issuers; slower clearance and longer settlement; and difficulties in obtaining and/or enforcing legal judgments.

Commodity-related investments and companies comprise a significant component of the economies of many emerging market countries. The prices of commodities can swing sharply in response to cyclical economic conditions, political, and regulatory events or the monetary policies of various countries, potentially causing the value of the Fund's securities to be more volatile or to decline in value significantly. In addition, political, regulatory, economic, and other conditions in a limited number of commodity-producing countries, including emerging markets, and factors affecting a particular region, industry, or commodity, such as drought, floods, or other weather conditions, livestock disease, changes in storage costs, trade embargoes, competition from substitute products, transportation bottlenecks or shortages, fluctuations in supply and demand, and tariffs may have a direct effect on the market value of commodities and the companies that engage in related businesses. For example, the vast majority of gold producers are domiciled in just five countries: South Africa, the United States, Australia, Canada, and Russia. Commodity markets are subject to disruptions due to lack of liquidity, the participation of speculators, and government regulation and other factors.

Substantially all the natural resources or related companies in which a Fund may invest could be located in foreign countries, including emerging markets, and the related companies may be small-capitalization companies. A Fund could incur, directly or indirectly, storage costs for bullion and coins.

A Fund's ability to invest directly or indirectly in natural resources, precious metals and other commodities, in financial instruments related to such assets, and in certain ETFs and other pooled investment vehicles investing in such assets or in instruments related to such assets, may be significantly limited by the Fund's intention to qualify for federal tax purposes as a "regulated investment company," and may bear on the Fund's ability to so qualify.

Financial Services Risk. Investing in issuers in the financial services sector involves, among others, the following risks: (i) changes in the regulatory framework or economic conditions that may negatively affect financial service businesses; (ii) exposure of a financial institution to non-diversified or concentrated loan portfolios; (iii) exposure to financial leverage and/or investments or agreements which, under certain circumstances, may lead to losses, for example sub-prime loans; (iv) the risk that a market shock or other unexpected market, economic, political, regulatory, or other event might lead to a sudden decline in the values of most or all companies in the financial services sector; and (v) the interconnectedness or interdependence among financial

services companies, including the risk that the financial distress or failure of one financial services company may materially and adversely affect a number of other financial services companies.

Focused Investment Risk. To the extent that the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector, or asset class, the Fund's exposure to various risks may be heightened, including price volatility and adverse economic, market, political, or regulatory occurrences affecting that issuer, country, group of countries, region, market, industry, group of industries, sector, or asset class.

Foreign (Non-U.S.) Investment Risk. Investments in securities of foreign companies, including foreign banks or foreign branches of U.S. banks, or governments can be more volatile than investments in U.S. companies or governments. Diplomatic, political, or economic developments, including nationalization or expropriation, could affect investments in foreign countries, or may at times subject such foreign countries to sanctions from the U.S. government, other foreign governments and/or international institutions that could negatively affect a Fund's investments in issuers located in, doing business in or with assets in such foreign countries. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the values of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign companies or governments generally are not subject to uniform accounting, auditing, and financial reporting standards comparable to those applicable to domestic U.S. companies or governments. Transaction costs are generally higher than those in the U.S. and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities. In some foreign markets, custody arrangements for securities provide significantly less protection than custody arrangements in U.S. markets, and prevailing custody and trade settlement practices (e.g., the requirement to pay for securities prior to receipt) expose a Fund to credit and other risks it may not have in the United States with respect to brokers, custodians, clearing banks or other clearing agents, escrow agents, and issuers. In addition, financial institutions serving as custodians in foreign jurisdictions may be less financially stable and/or have less effective controls than financial institutions operating as custodians in the United States. Investment in sovereign debt obligations by a Fund involves risks not present in debt obligations of corporate issuers. The issuer of debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due in accordance with the terms of such debt, and a Fund may have limited recourse to compel payment in the event of a default. Periods of economic

uncertainty may result in volatility of market prices of sovereign debt and, in turn, a Fund's NAV, to a greater extent than the volatility inherent in debt obligations of U.S. issuers. Some foreign governments levy withholding or other taxes in respect of foreign securities. Although in some countries a portion of these taxes is recoverable, the unrecovered portion will reduce the Fund's yield on such securities.

Investments in foreign securities denominated in foreign currencies involve additional risks, including:

- The value of a Fund's assets measured in U.S. dollars may be affected by changes in currency rates and in exchange control regulations;
- A Fund may incur substantial costs in connection with conversions between various currencies;
- A Fund may be unable to hedge against possible variations in foreign exchange rates or to hedge a specific security transaction or portfolio position; and
- Only a limited market currently exists for hedging transactions relating to currencies in certain emerging markets.
- Investments in foreign securities may take the form of sponsored or unsponsored depositary receipts. Depositary receipts may represent the right to receive securities of foreign issuers deposited in a bank or other depository. Some depositary receipts are traded in the United States with prices quoted in U.S. dollars.

Some countries in which certain of the Equity Funds may invest require government approval for the repatriation of investment income, capital, or the proceeds of sales of securities by foreign investors. In addition, if there is deterioration in a country's balance of payments, or for other reasons, a country may impose temporary restrictions on foreign capital remittances abroad.

Frontier Market Risk. Because frontier markets are among the smallest, least mature and least liquid of the emerging markets, investments in frontier markets generally are subject to a greater risk of loss than investments in developed markets or traditional emerging markets. Frontier market countries have smaller economies, less-developed capital markets, more political and economic instability, weaker legal, financial accounting and regulatory infrastructure, and more governmental limitations on foreign investments than typically found in more developed countries, and frontier markets typically have greater market volatility, lower trading volume, lower capital flow, less investor participation, fewer large global companies, and greater risk of a market shutdown than more developed markets. Frontier markets are more prone to economic shocks associated with political and economic risks than are emerging markets generally. Many frontier market countries may be dependent on commodities, foreign trade, or foreign aid.

Growth Investing Risk. Growth stocks are generally more sensitive to market movements than other types of stocks primarily because their stock prices are based heavily on future expectations. If the Adviser's assessment of the prospects for a company's growth is wrong, or if the Adviser's judgment of how other investors will value the company's growth is wrong, then the price of the company's stock may fall or not approach the value that the Adviser has placed on it. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of the issuer's bonds and preferred stock generally take precedence over the claims of those who own common stock.

Investment Company Risk. Certain Funds may invest in shares of other investment companies, including ETFs. To the extent a Fund invests in shares of another investment company or ETF, investors bear their proportionate share of the expenses of the underlying investment company or ETF. ETFs and closed-end investment companies may trade at a price below their NAV. The Adviser has a conflict of interest with respect to the decision to invest a Fund's assets in another fund that it or its related persons sponsors or advises (as compared to investing directly in other securities or funds sponsored or advised by others), and the Adviser and its related persons may benefit from any such investments. Notwithstanding this conflict of interest, the Adviser seeks to select investments in the Fund's best interest irrespective of whether a fund's sponsor or adviser is the Adviser or a related person of the Adviser.

Issuer Risk. The value of the Fund's investments may decline for a number of reasons directly related to the issuer, such as management performance, financial leverage, and reduced demand for the issuer's goods or services, in addition to the historical and prospective earnings of the issuer and the value of its assets.

Leverage Risk. Certain transactions may give rise to a form of leverage, including, but not limited to, derivative instruments, certain ETFs, reverse repurchase agreements, loans of portfolio securities, and the use of when-issued, delayed-delivery, or forward-commitment transactions. Leveraging may cause a Fund to liquidate portfolio positions to satisfy its obligations at disadvantageous times or prices. Leveraging, including borrowing, may cause a Fund's performance to be more volatile than if the Fund had not been leveraged. This is because leveraging tends to exaggerate the effect of any increase or decrease in the value of a Fund's portfolio securities (or the value of the underlying funds). Certain types of leveraging transactions, such as short sales that are not "against the box," could theoretically be subject to unlimited losses in cases where a Fund, for any reason, is unable to close out the transaction.

Limited Operating History Risk. A newly formed Fund has no or a limited operating history for investors to evaluate. A newly formed Fund may not attract sufficient assets to achieve or maximize investment and operational efficiencies and remain viable. If a newly formed Fund fails to achieve sufficient scale, it may be liquidated.

Liquidity Risk. Liquidity risk exists when particular investments are difficult to purchase or sell. Investments in illiquid securities involve the risk that they cannot be disposed of at approximately the value at which the Fund has valued the securities or at all. A Fund's investments in securities that are or become illiquid may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price or at all. Additionally, the market for certain investments may become illiquid under adverse market or economic conditions independent of any specific adverse changes in the conditions of a particular issuer. In such cases, a Fund, due to limitations on investments in illiquid securities and the difficulty in purchasing and selling such securities or instruments, may be unable to achieve its desired level of exposure to a certain sector. Bond markets have consistently grown over the past three decades while the growth of capacity for traditional dealer counterparties to engage in fixed income trading has not kept pace and in some cases has decreased. As a result, dealer inventories of certain types of bonds and similar instruments, which provide a core indication of the ability of financial intermediaries to "make markets," are at or near historic lows in relation to market size. Because market makers provide stability to a market through their intermediary services, the significant reduction in dealer inventories could potentially lead to decreased liquidity and increased volatility in the fixed income markets. Such issues may be exacerbated during periods of economic uncertainty.

To the extent that a Fund invests in foreign (non-U.S.) securities, derivatives, or securities with substantial market and/or credit risk, a Fund will tend to have greater exposure to liquidity risk. The values of illiquid investments are often more volatile than the values of more liquid investments. It may be more difficult for a Fund to determine an accurate good faith fair value of an illiquid investment than that of a more liquid comparable investment. If a Fund sells investments with extended settlement times, the settlement proceeds from the sales may not be available to meet the Fund's redemption obligations for a substantial period of time.

Management and Operational Risk. The Funds are subject to management risk because they are actively managed. The Adviser will apply investment techniques and risk analysis in making investment decisions for the Funds, but there can be no guarantee that these decisions will produce the desired outcome. Additionally, legislative, regulatory, or tax developments may affect the investment techniques available to the Adviser in managing the Funds and may also adversely affect the ability of the Funds to achieve their investment objectives. Moreover, the consequences of events with limited or no historical precedent may be especially difficult to predict or manage.

Certain operational issues may adversely affect the value of your investment in the Fund and your ability to receive redemption proceeds timely. Cyber-attacks, disruptions, or failures that affect a Fund's service providers, a Fund's counterparties, market participants, issuers of securities held

by a Fund, or the systems or technology on which a Fund may rely, may adversely affect a Fund and its shareholders, including by causing losses for a Fund or impairing Fund operations, such as calculating the Fund's NAV or processing redemptions.

Market Risk. Market risk is the risk that securities prices will fall over short or extended periods of time. Historically, the securities markets have moved in cycles, and the value of a Fund's securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may decline in response. The value of your investment in a Fund is based primarily on the market prices of the securities the Fund holds. These prices change daily due to economic and other events that affect particular companies and other issuers. These price movements, sometimes called volatility, may be greater or lesser depending on the types of securities the Fund owns and the markets in which they trade.

The effect on a Fund of a change in the value of a single security will depend on how widely the Fund diversifies its holdings. A Fund's investments in convertible securities have characteristics of both fixed income and equity securities. The value of a convertible security tends to move with the market value of the underlying stock, but may also be affected by interest rates, credit quality of the issuer and any call provisions. Each Fund is subject to the risk that the asset class(es) in which it invests primarily may underperform the asset class(es) in which it does not invest primarily.

Geopolitical and other events may disrupt markets and adversely affect global economies. Likewise, natural and environmental disasters and systemic market dislocations of the kind surrounding the insolvency of Lehman Brothers in 2008, if repeated, would be highly disruptive to economies and markets. Those events, as well as other changes in foreign and domestic economic and political conditions, also could adversely affect individual issuers or related groups of issuers, securities markets, interest rates, credit ratings, inflation, investor sentiment, and other factors affecting the value of a Fund's investments. These events could also cause a Fund's exposure to the risks described elsewhere in this prospectus to increase. Market disruptions can also prevent a Fund from implementing its investment programs for a period of time and achieving its investment objective.

In response to governmental actions or intervention, economic or market developments, or other external factors, markets may experience periods of high volatility and reduced liquidity. During those periods, the Funds may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, and potentially at unfavorable prices. Securities may be difficult to value during such periods. Federal, state, and other governments, their regulatory agencies, or self-regulatory organizations may take actions that affect the regulation of the securities in which a

Fund invests or the issuers of such securities in ways that are unforeseeable. Legislation or regulation also may change the way in which the Funds or the Adviser are regulated. Such legislation, regulation, or other government action could limit or preclude a Fund's ability to achieve its investment objective and affect the Fund's performance.

Political, social, or financial instability, civil unrest, and acts of terrorism are other potential risks that could adversely affect an investment in a security or in markets or issuers generally. In addition, political developments in foreign countries or the United States may at times subject such countries to sanctions from the U.S. government, foreign governments, and/or international institutions that could negatively affect a Fund's investments in issuers located in, doing business in or with assets in such countries. A Fund may continue to accept new subscriptions and to make additional investments in instruments in accordance with the Fund's principal investment strategies to strive to meet the Fund's investment objectives under all types of market conditions, including unfavorable market conditions.

The U.S. and other governments and the Federal Reserve and certain foreign central banks have taken steps to support financial markets. For example, in recent periods, governmental financial regulators, including the Federal Reserve, have taken steps to maintain historically low interest rates, such as by purchasing bonds. Steps by those regulators, including, for example, steps to reverse, withdraw, curtail, or taper such activities, could have a material adverse effect on prices for a Fund's portfolio of investments and on the management of the Funds. The withdrawal of support, failure of efforts in response to a financial crisis, or investor perception that those efforts are not succeeding could negatively affect financial markets generally as well as the values and liquidity of certain securities. Securities markets may, in response to governmental intervention, economic or market developments, or other factors, experience periods of high volatility and reduced liquidity. During those periods, the Fund may experience high levels of shareholder redemptions, and may have to sell securities at times when it would otherwise not do so, and at unfavorable prices. Securities may be difficult to value during such periods.

Any partial or complete dissolution of the European Monetary Union (the "EMU") could have significant adverse effects on currency and financial markets, and on the values of a Fund's portfolio investments. If one or more EMU countries were to stop using the euro as its primary currency, a Fund's investments in such countries may be redenominated into a different or newly adopted currency. As a result, the value of those investments could decline significantly and unpredictably. In addition, securities or other investments that are redenominated may be subject to liquidity risk and the risk that the Funds may not be able to value investments accurately to a greater extent than similar investments currently denominated in euros. To the extent a currency used for redenomination purposes is not specified in respect of certain

EMU-related investments, or should the euro cease to be used entirely, the currency in which such investments are denominated may be unclear, making such investments particularly difficult to value or dispose of. A Fund may incur additional expenses to the extent it is required to seek judicial or other clarification of the denomination or value of such securities.

A Fund may continue to accept new subscriptions and to make additional investments in instruments in accordance with the Fund's principal investment strategies to strive to meet the Fund's investment objectives under all types of market conditions, including unfavorable market conditions.

Portfolio Turnover Risk. It is anticipated that the Equity Funds that use quantitative strategies will experience high rates of portfolio turnover, which may result in payment by the Fund of above-average transaction costs. High portfolio turnover may involve correspondingly greater transaction costs in the form of dealer spreads or brokerage commissions. It may result in increased realization of net short-term capital gains (which are taxable to shareholders as ordinary income when distributed to them), higher taxable distributions, and lower after-tax performance.

Disclosure of Portfolio Holdings

Each Fund publishes on the Funds' website (pncfunds.com) its complete portfolio holdings as of the end of each calendar quarter. In addition, each Fund publishes on the Funds' website portfolio holdings information as of each calendar month-end. Portfolio holdings information is typically posted within 15 days after the end of each calendar quarter or month, as applicable. This information will be available on the Funds' website until the date on which a Fund files its next quarterly portfolio holdings report with the SEC on Form N-CSR or Form N-Q. After April 30, 2019, the information will be available on the Funds' website until the date on which a Fund files its next monthly portfolio holdings report with the SEC on Form N-PORT. For more information on the Funds' policies and procedures with respect to the disclosure of portfolio securities, see the Funds' Statement of Additional Information, which is available, free of charge, on the Funds' website (http://pncfunds.com/resources/prospectus_reports/default.fs).

MANAGEMENT OF THE FUNDS

Investment Adviser

PNC Capital Advisors, LLC (the "Adviser") is the investment adviser to the Funds and is located at One East Pratt Street – 5th Floor, Baltimore, MD 21202. As of October 31, 2018, the Adviser had approximately \$52.2 billion in assets under management.

The Adviser makes investment decisions for the Funds and continuously reviews, supervises and administers each Fund's investment program. The Board supervises the Adviser and

establishes policies that the Adviser must follow in its management activities. The Adviser utilizes a team approach for management of the Funds. No one person is primarily responsible for managing the Funds or making investment recommendations to the team.

The table below shows the management fees (after all fee waivers and expense reimbursements) the Adviser received from each Fund for the fiscal year ended May 31, 2018 and each Fund's contractual management fee:

Fund Name	Management Fees Paid as a Percentage of Average Net Assets for the Fiscal Year Ended May 31, 2018	Contractual Management Fee as a Percentage of Average Net Assets
Emerging Markets Equity Fund	0.17%	1.00%
International Growth Fund	0.00%	0.80%

Additional Information Regarding Board Approval of Investment Advisory Agreement

A discussion regarding the basis for the Board's approval of the investment advisory agreement will be available in the Funds' semi-annual reports to shareholders for the period ended November 30, 2018.

Manager of Managers Structure

The Funds have received an exemptive order from the SEC to operate under a manager of managers structure that permits the Adviser, with the approval of the Board, to appoint and replace sub-advisers and materially amend existing sub-advisory

agreements without shareholder approval ("Manager of Managers Structure"). Under the Manager of Managers Structure, the Adviser has the ultimate responsibility, subject to oversight by the Funds' Board, for overseeing the Funds' sub-advisers, notifying them of their termination and recommending to the Board their hiring or replacement. Currently, only PNC International Equity Fund, another series of PNC Funds that is not offered in this prospectus, operates under a Manager of Managers structure. The Adviser may, in the future, recommend to the Board the establishment of the Manager of Managers Structure for any of the Funds.

Shareholders will be notified within 90 days of the hiring of a sub-adviser.

Portfolio Management Teams

References to the "Adviser" in the portfolio manager descriptions below include the Adviser, the predecessor firm or affiliates.

Name	Business experience
Emerging Markets Equity Fund	
Martin C. Schulz Managing Director Years with the Adviser: 20 Industry experience: 23 years Tenure managing Fund: Since inception (2017)	Mr. Schulz is the lead portfolio manager and is jointly and primarily responsible for the day-to-day management of the Fund. Mr. Schulz has been with the Adviser since 1998.
Calvin Y. Zhang Senior Analyst/Portfolio Manager Years with the Adviser: 10 Industry experience: 14 years Tenure managing Fund: Since inception (2017)	Mr. Zhang is jointly and primarily responsible for the day-to-day management of the Fund. Mr. Zhang has been with the Adviser since 2008. Prior to joining the Adviser, from 2004 to 2008, Mr. Zhang was an analyst and portfolio manager with Driehaus Capital Management where he covered China, Taiwan, and Korea and helped manage their International Select Portfolio Fund.
International Growth Fund	
Martin C. Schulz Managing Director Years with the Adviser: 20 Industry experience: 23 years Years managing Fund: 2	Mr. Schulz is the lead portfolio manager and is jointly and primarily responsible for the day-to-day management of the Fund. Mr. Schulz has been with the Adviser since 1998.
Calvin Y. Zhang Senior Analyst/Portfolio Manager Years with the Adviser: 10 Industry experience: 14 years Years managing Fund: 2	Mr. Zhang is jointly and primarily responsible for the day-to-day management of the Fund. Mr. Zhang has been with the Adviser since 2008. Prior to joining the Adviser, from 2004 to 2008, Mr. Zhang was an analyst and portfolio manager with Driehaus Capital Management where he covered China, Taiwan, and Korea and helped manage their International Select Portfolio Fund.

Additional information about the portfolio managers' compensation, other accounts managed by the portfolio managers, and the portfolio managers' ownership of shares of the Funds is described in the Statement of Additional Information.

Additional Information

The Board generally oversees the operations of the Funds and the Trust. The Trust enters into contractual arrangements with various parties, including among others the Funds' investment adviser, sub-advisers, custodian, transfer agent, and accountants, who provide services to the Funds. Shareholders are not parties to any such contractual arrangements and are not intended third-party (or other form of) beneficiaries of those contractual arrangements. The Trust's and the Funds' contractual arrangements are not intended to create any shareholder rights to enforce such contracts directly against the service providers or to seek any remedy under those contracts directly against the service providers.

This prospectus has been designed to meet the regulatory purpose of providing information concerning the Trust and the Funds that you should consider carefully in determining whether to purchase shares of a Fund. Neither this prospectus, the Funds' Statement of Additional Information, nor the

Funds' registration statement, is intended, or should be read, to be or to give rise to an agreement or contract between the Trust or the Funds and any shareholder, or to give rise to any rights in any shareholder or other person other than any rights under federal or state law that may not be waived.

PURCHASING, EXCHANGING, AND REDEEMING FUND SHARES

This section tells you how to purchase, exchange, and redeem Class R6 Shares of the Funds. Generally, the Funds do not accept purchase orders from foreign investors; however, the Funds reserve the ability to change this practice without prior notice. The Funds may accept or reject any purchase order. Your financial consultant, financial intermediary, or institution may charge a fee for its services, in addition to the fees charged by the Funds.

The Funds offer other share classes that have different fees and expenses, which are described in the prospectuses for the applicable share classes. Some of the share classes described in this section may not be available for purchase from a Fund.

The following table summarizes certain fee, expense and eligibility features of Class R6 Shares.

	R6 Shares
Maximum Front-end Sales Charge (Load)	None
Maximum Dealer Reallowance	N/A
Contingent Deferred Sales Charge ("CDSC") Time Frame	None
CDSC Charge	None
12b-1 fees	None
Shareholder Servicing Fees	None
Minimum Initial Investment	None
Minimum Subsequent Investment	None

Class R6 Shares have no sales charge and no minimum initial investment.

Class R6 shares are available for purchase by Class R6 Eligible Plans, including:

- Qualified 401(a) plans (including 401(k) plans, Keogh plans, profit-sharing pension plans, money purchase pension plans, target benefit plans, defined benefit pension plans, and Taft-Hartley multi-employer pension plans);
- 403(b) plans and tax-sheltered annuity plans;
- 457 plans, including 457(a) governmental entity plans and tax-exempt plans;
- Nonqualified deferred compensation plans, including rabbi trusts and similar arrangements;
- Health savings accounts (HSAs); and
- Funded welfare benefit plans (e.g., Voluntary Employees' Beneficiary Association (VEBA) plans, and Other Post-Employment (OPEB) plans).

Class R6 shares are also available for purchase by Class R6 Eligible Investors, including:

- Endowment funds and foundations;
- Any state, county or city, or its instrumentality, department, authority, or agency;
- Insurance companies, trust companies and banks, or bank trust departments;
- Investment companies and other pooled investment vehicles, both affiliated and not affiliated with the Adviser;
- Investors who purchase shares through asset-based fee programs of certain financial intermediaries that have entered into an agreement with the Fund's distributor to offer Class R6 Shares through such programs; and Fund trustees and other individuals who are affiliated with the Fund and other PNC Funds.

Class R6 Shares are generally only available to Class R6 Eligible Plans and Class R6 Eligible Investors who hold shares through a plan-level or omnibus account and who do not require (or whose intermediaries do not require) payment from the Fund for providing administrative, recordkeeping, or similar services in respect of plan investors or other beneficial shareholders. Class R6 shares are not available to traditional and Roth individual retirement accounts (IRAs), Coverdell Education Savings Accounts, SEPs, SAR-SEPs, SIMPLE IRAs, or 529 college savings plans, or to other retail or institutional investors unless the plans or accounts otherwise qualify as Class R6 Eligible Plans or Class R6 Eligible Investors.

The Adviser and its affiliates currently make payments from their own resources to financial intermediaries that generate purchase orders. The Adviser or its affiliates may pay fees, from their own assets, to financial intermediaries (including financial intermediaries that are affiliates of the Adviser) for shareholder or administrative services in connection with investments in the Funds. These fees are in addition to any fees that may be paid by the Funds for these types of services or other services, including 12b-1 fees. The Adviser and its affiliates also participate in certain arrangements whereby the Adviser or its affiliates may pay from their own resources financial intermediaries for inclusion of the Funds on certain

preferred sales lists or other similar programs intended to generate fund sales. In some cases, these payments may create an incentive for a financial intermediary to recommend sales of Fund shares. In addition, the Adviser or its affiliates may also share certain marketing support expenses for such intermediaries to raise awareness of the Funds. Such payment may be in addition to, or in lieu of, sales- and asset-based payments. The payment arrangements described herein will not change the price an investor pays for shares of the Funds nor the amount that a Fund receives to invest on behalf of the investor. The Adviser or its affiliates may discontinue these payments at any time. Investors should consider whether such arrangements exist when evaluating any recommendation from an intermediary to purchase or sell shares of a Fund. Please see the Statement of Additional Information for more information on these payments and the programs described above.

The Adviser will monitor each Fund's asset size and, subject to approval by the Board, may decide to close a Fund at any time to new investments or new accounts if the Adviser believes that an increase in the asset size of a Fund may adversely affect the implementation of the Fund's strategies. If a Fund is closed, the Fund may continue to accept additional investments from existing shareholders.

How to Purchase and Exchange Fund Shares

	New Account Set Up	Adding to an Existing Account
Online pncfunds.com	<ul style="list-style-type: none"> • Visit our site and click on "Open an Account" to submit an online application. Or log on to our on-line Forms Center to print an application and mail to the address below. • Unless you arrange to pay by wire or Automated Clearing House ("ACH"), write your check, payable in U.S. dollars, to "PNC Funds (Fund name)." PNC Funds cannot accept third-party checks, starter checks, credit cards, credit card checks, cash, or cash equivalents (i.e., cashier's check, bank draft, money order, or travelers' check). 	<ul style="list-style-type: none"> • You may place your purchase order on our website using your established banking instructions for payment. To authorize this service, please complete an Account Maintenance Form or call 1-800-622-FUND (3863).
By Mail	<ul style="list-style-type: none"> • Complete and sign an application. Applications may be requested by calling 1-800-622-FUND (3863) and are also available at pncfunds.com. • Make your check payable to "PNC Funds (Fund Name)." 	New Account Set Up	Adding to an Existing Account
By Telephone with Wire Transfer	<ul style="list-style-type: none">• Call Investor Services at 1-800-622-FUND (3863) to set up an account number to be included in the body of the wire.• Ask your bank to immediately transmit available funds by wire. Your bank may charge you a wiring fee for this service.• Wiring instructions are as follows: The Bank of New York Mellon ABA # 011001234 Credit: 0000735906 The Bank of New York Mellon As Agent for PNC Funds Further Credit: Beneficiary Name Beneficiary Fund/Account Number• Complete and sign the account application and mail to: PNC Funds c/o The Bank of New York Mellon P.O. Box 9795 Providence, RI 02940-9795 Overnight delivery to: PNC Funds c/o The Bank of New York Mellon 4400 Computer Drive Westborough, MA 01581-1722 <p>PNC Funds and its transfer agent are not responsible for the consequences of delays resulting from the banking or Federal Reserve Wire system, or from incomplete wiring instructions.</p>	<ul style="list-style-type: none">• If you previously selected the telephone purchases option for your account, call Investor Services at 1-800-622-FUND (3863) to purchase additional shares.• If your bank account information is on file, you can request purchases through federal funds wire or electronic transfer through the ACH.• To add telephone purchases option to your account, please complete an Account Maintenance Form or call Investor Services. <p>PNC Funds and its transfer agent are not responsible for the consequences of delays resulting from the banking or Federal Reserve Wire system, or from incomplete wiring instructions.</p>
By Exchange	<ul style="list-style-type: none">• You may exchange your shares of a PNC Fund for the same class of shares of another PNC Fund.• Call with your account name, number, and amount of exchange into an existing account (minimum amount for Class A and Class C Shares is \$1,000).• Please see “General Information Regarding Purchases” for information regarding the deadlines for the submission of purchase and sale orders for the Funds. Not all of the PNC Funds have the same deadline for the submission of orders for processing. Accordingly, when you exchange shares of one PNC Fund for shares of another PNC Fund, your account may be un-invested for the period of time between when the sale portion of your request exchange has been effected and when the purchase portion of your exchange has been effected.	<ul style="list-style-type: none">• If you previously selected the telephone exchange option for your account, call our Investor Services at 1-800-622-FUND (3863) to exchange your shares.• To authorize exchanges to your account, please complete an Account Maintenance Form or call Investor Services.

Financial Intermediary

- Contact your financial consultant, financial intermediary, or institution to transact initial purchases or additional purchases of shares of PNC Funds. Your financial intermediary is responsible for transmitting all purchase and sale requests, investment information, documentation and money to PNC Funds’ transfer agent on time.
- Your financial consultant, financial intermediary or institution may set different minimum initial and additional investment requirements and may charge you fees or commissions in connection with that purchase that are not otherwise disclosed in this prospectus.
- In order for you to receive a Fund’s NAV determined on a Business Day when you purchase, redeem, or exchange through an authorized financial intermediary, your authorized financial intermediary must receive your purchase, redemption, or exchange request in good order before the time as of which the Funds calculate their NAVs (normally, 4:00 p.m., Eastern time) and the authorized financial intermediary must subsequently communicate the request properly and timely to the Fund. However, the Funds may enter into contractual arrangements with certain brokers and financial intermediaries or their authorized designees (“authorized intermediaries”) to treat purchase and redemption orders as received by a Fund as of the time they

are received by the financial intermediary. In general, the Funds will be deemed to have received such purchase or redemption orders as of the time they are received in good order as determined by the financial intermediary and in accordance with this prospectus. The time as of which shares are priced and the time until which purchase, exchange and redemption orders are accepted for processing at the NAV calculated that day may be changed by a Fund in its discretion (without notice) as permitted by applicable law or the SEC.

Note: If you recently purchased shares by check or through ACH, you may not be able to exchange your shares until your check or ACH transmission has cleared (which may take up to 15 business days from your date of purchase).

When you exchange shares, you are really selling your shares, which may subject you to tax, and buying other Fund shares. Your sale price and purchase price will be based on the NAVs next calculated after a Fund receives your exchange request.

How We Calculate NAV

The price of Fund shares is based on the Fund's NAV. The NAV for one Fund share is the value of that share's portion of the assets of the Fund less liabilities and share class expenses.

The Funds value their portfolio securities for purposes of calculating their NAVs using procedures approved by the Funds' Board. Those procedures allow for a variety of methodologies to be used to value a Fund's securities. The specific methodologies used for a particular security may vary based on the market data available for a specific security at the time a Fund calculates its NAV or based on other considerations. The procedures also permit a level of judgment to be used in the valuation process. Accordingly, the methodologies summarized below are not an exhaustive list of the methodologies a Fund may use to value a security and they may not represent the means by which a Fund's investments are valued on any particular business day.

In calculating NAV, a Fund generally values its investment portfolio at market price. Equity securities that are listed on a securities exchange or quoted on a national market system, and for which market quotations are readily available, are normally valued at the last quoted sales price on the exchange or market on which they principally trade. Values for fixed income securities may be determined on the basis of evaluations provided by an independent pricing service. These securities are typically valued at quoted bid prices (as obtained by the pricing service from dealers in such securities) when readily available and representative of the bid side of the market. Debt securities that are valued using pricing service evaluations or fair values determined by the Adviser's Pricing Committee may be valued based on information such as the yields or prices of bonds of comparable quality, coupon, maturity and type; quoted bid prices or indications as to values from dealers or other financial institutions that trade the securities; and general market conditions. The independent

pricing service may also employ electronic data processing techniques and matrix systems to determine the values of the Funds' fixed income securities. The Funds may hold investment positions in sizes smaller than institutionally sized round lot positions (sometimes referred to as 'odd lots'). Pricing services generally provide evaluations on the basis of institutionally sized round lots. The Funds do not generally apply (and have not historically applied) discounts to pricing service evaluations of securities when they hold and value odd lot positions. If a Fund sells a position in an odd-lot transaction, the sale price may be less than the value at which the position has been held by the Fund.

Some Funds may hold securities that are listed on foreign exchanges. Foreign securities are valued at the last sale price on the exchange on which they are principally traded or, if there is no recent sale, at the last current bid quotation and are translated from the local currency into U.S. dollars using the prevailing market rate at the close of markets on the day of valuation. Foreign securities may trade on weekends or other days when the Fund does not calculate NAV. As a result, the market value of these investments may change on days when you cannot buy or redeem shares of the Funds.

Futures contracts are valued at daily quoted settlement prices. Forward currency contracts are valued based upon closing exchange rates from each respective foreign market.

Investments by any Fund in any mutual fund are valued at their respective NAVs, if available, as determined by those mutual funds each Business Day. The prospectuses for those mutual funds explain the circumstances under which those funds will use fair value pricing and the effects of using fair value pricing.

If market prices are not readily available, including when quoted prices are considered to be unreliable by the Adviser, fair value prices will be determined in good faith by the Adviser, assisted by the Fund accountant, using methods approved by the Board. A Fund will use fair value pricing if the value of a security it holds has been materially affected by events occurring before the Fund's pricing time but after the close of the primary markets or exchange on which the security is traded. Significant events (e.g., movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time as of which the Fund calculates its NAV that may impact the value of securities traded in these foreign markets. This most commonly occurs with foreign securities, but may occur in other cases as well. In these cases, information furnished by an independent pricing service may be utilized to adjust closing market prices of certain foreign common stocks to reflect their fair value. The independent pricing service may draw upon, among other information, the market values of foreign investments. Because the frequency of significant events is not predictable, fair valuation of certain common stocks may occur on a frequent basis. A Fund may also use fair value pricing for domestic

securities when a significant event (e.g., there is a “thin” market in the security or the security has not been traded for an extended period of time) impacts the value of such securities such that market quotations are not reliable or readily available. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same security.

Investment transactions are recorded on trade date for financial statement preparation purposes. As is normal procedure in the mutual fund industry, for days other than financial reporting period ends, investment transactions not settling on the same day are recorded and factored into a Fund’s NAV on the Business Day following trade date (T+1). Realized gains and losses on investments sold are recorded on the identified cost basis. Interest income is recorded on the accrual basis. Discounts and premiums are accreted and amortized, respectively, to interest income over the estimated lives of the respective investments. Expenses common to all the Funds in PNC Funds may be allocated among the Funds on the basis of average net assets. Distribution (12b-1) fees, shareholder service fees, sub-administration fees, recordkeeping fees and/or sub-transfer agency services fees relating to a specific Class are charged directly to that Class.

The Statement of Additional Information contains more detailed information concerning how the Funds value their investments.

General Information Regarding Purchases

You may purchase shares of the Funds on each day that the NYSE is open. Shares cannot be purchased by wire transactions on days when the Federal Reserve banks are closed.

PNC Funds may reject any purchase order, including if it is determined that accepting the order would not be in the best interests of a Fund or its shareholders. A Fund seeks to make these decisions to the best of its abilities in a manner that it believes is consistent with shareholder interests. A Fund may reject, cancel, or revoke the purchase on the same Business Day, or as soon thereafter as possible.

The price per share (the offering price) will be the NAV next determined after a Fund receives your purchase order in good order. In order for you to receive a Fund’s next-calculated NAV determined on a Business Day when you purchase through an authorized financial intermediary, your authorized financial intermediary must receive your purchase request in good order before the time as of which the Funds calculate their NAVs (normally, 4:00 p.m., Eastern time) and the authorized financial intermediary must subsequently communicate the request properly and timely to the Fund. On days when the NYSE has scheduled an early close for regular trading on the NYSE (e.g., due to a holiday), the Funds normally calculate their NAVs as of the time of that early close. Notwithstanding the preceding, the Funds may determine to calculate their NAVs as of the close of regular trading on the NYSE on any day when there is an unscheduled early close to regular trading

on the NYSE. Good order means, among other things, that your request includes complete information. In general, a purchase order is in “good order” if it includes: (i) the name of the Fund and share class being purchased; (ii) the U.S. dollar amount of the shares to be purchased; (iii) the name and/or the account number (if any) set forth with sufficient clarity to avoid ambiguity; and (iv) the signature of an authorized signatory. The Fund reserves the right to require additional information at any time for a purchase order to be in “good order.” Each Fund’s NAV is not calculated on holidays when the NYSE is closed for trading.

General Information Regarding Short-Term Trading

The Board has adopted policies and procedures that impose limits on purchases, exchanges, and redemptions to discourage excessive short-term (market timing) trading by shareholders. Under the policies and procedures, a Fund or its delegate shall request representations of compliance with the Fund’s market timing procedures from parties involved in the distribution of Fund shares and administration of shareholder accounts. Funds that operate as money market funds generally do not seek to detect short-term trading, but reserve the right to do so when the Board deems appropriate.

There is no guarantee that PNC Funds or its agents will be able to detect frequent trading activity, identify the shareholders engaged in such activity, or, if it is detected, prevent its recurrence. The ability of PNC Funds and its agents to monitor trades that are placed through omnibus or other nominee accounts, where the holdings of multiple shareholders are aggregated, is limited. Omnibus accounts, in which shares are held in the name of a financial intermediary on behalf of multiple investors, are a common form of holding shares among retirement and college saving plans and financial intermediaries such as brokers, advisers, and third-party administrators. Omnibus accounts aggregate purchase or redemption and exchange requests on a daily basis and the identity of individual investors may not be known to the Fund. With respect to suspected market timing by investors who acquire shares through omnibus accounts, different purchase and exchange limitations may apply. These limitations may be more or less restrictive than those imposed on direct and fully disclosed accounts. Investors who hold Fund shares through a financial intermediary are advised to consult the intermediary to determine what purchase and exchange limitations apply to their accounts.

Short-term trading creates transaction costs that are borne by all shareholders and disrupts the orderly management of a Fund’s portfolio investments. Funds that invest in overseas securities markets are particularly vulnerable to market timers who may take advantage of time zone differences between the foreign markets on which these Funds’ portfolio securities trade and the U.S. markets which generally determine the time as of which NAV is calculated (“time-zone arbitrage”). For additional information on time zone arbitrage, see the

Statement of Additional Information. Further, Funds that invest in small-cap securities and other types of investments which are not frequently traded, including high-yield bonds, also can be the targets of market timers.

General Trading Limits: Fund shareholders are limited to no more than one “round trip” transaction during a 60-day period. A round trip occurs when a shareholder purchases or exchanges-in shares and then subsequently sells or exchanges-out shares within a short period of time of the original purchase or exchange-in date. A Fund may restrict or refuse purchase and exchange orders into the Fund if a shareholder has made two or more round trips during a 60-day period.

PNC Funds reserves the right to notify shareholders who violate PNC Funds’ general trading limits as such violations may constitute market timing activities. If a shareholder continues such deemed market timing activities after being notified, the account may be closed to new purchases or exchanges of Fund shares.

If any transaction is deemed to have the potential to adversely impact a Fund, the Fund reserves the right to:

- Reject a purchase or exchange order
- Delay payment of immediate cash redemption proceeds for up to seven calendar days
- Revoke a shareholder’s privilege to purchase Fund shares (including exchanges or “round trips”)
- Limit the amount of any exchange
- Close an account

How to Redeem Your Fund Shares

Shareholders may redeem shares by following the procedures described below. For information about the deadline to receive the next-calculated NAV and dividend accrual, if applicable, please see “General Information Regarding Purchases” in this prospectus.

Online pncfunds.com

The minimum amount for Internet redemptions is \$100.

By Telephone 1-800-622-FUND (3863)

Call with your account name, number, and amount of redemption. Redemptions will be sent to the shareholder’s address or bank account on record.

By Mail

Provide redemption instructions with your name, fund name, share class, your account number, and the amount you would like to sell in dollars or shares. These instructions must be signed by each owner of the account or authorized signatory.

Mail the instructions to:

PNC Funds
c/o The Bank of New York Mellon
P.O. Box 9795
Providence, RI 02940-9795

Overnight delivery to:

PNC Funds
c/o The Bank of New York Mellon
4400 Computer Drive
Westborough, MA 01581-1722

Financial Intermediary

Contact your financial consultant, financial intermediary or institution to redeem your shares. Your financial consultant, financial intermediary or institution may charge a fee for its services, in addition to the fees charged by the Funds.

PNC Funds reserves the right to revise or terminate the exchange privilege at any time, for any reason. You will be provided 60 days’ written notice before any material change to the exchange privilege is made.

General Information Regarding Exchanges

You may exchange your shares of a Fund for the same class of shares of another Fund. You may exchange your shares on any Business Day. Please see the section of this prospectus entitled “General Information Regarding Purchases” for information regarding the deadlines for the submission of purchase and sale orders for the Funds. Not all of the Funds have the same deadline for the submission of orders for processing.

Accordingly, when you exchange shares of one Fund for shares of another Fund, your account may be uninvested for the period of time between when the sale portion of your request exchange has been effected and when the purchase portion of your exchange has been effected.

When you exchange shares, you are really selling your shares, which may subject you to tax, and buying other Fund shares. Your sale price and purchase price will be based on the NAVs next calculated after a Fund receives your exchange request.

Subject to initial and subsequent investment minimums, you may exchange Class R6 Shares of any Fund for Class R6 Shares of any other Fund.

Sales Charges

There are no sales charges on the purchase of Class R6 Shares.

Signature Guarantee

The use of a signature guarantee is common in the securities industry. Its purpose is to authenticate the signature and capacity of a person requesting the redemption or transfer of securities and is for your protection as well as the Fund's.

We will accept only STAMP2000 New Technology Medallion Signature Guarantee stamps from eligible guarantors. These include banks, broker-dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies, and savings associations. The signature guarantee must appear on the same document as the signature(s) being guaranteed and as close as practicable to the endorsement.

To obtain the signature guarantee, you must take your unsigned document to the guaranteeing institution. Most institutions will not guarantee your signature unless you sign in their presence. Be sure to bring the kind of personal identification with you that the guaranteeing institution requires. The guaranteeing institution must use a STAMP2000 New Technology Medallion Signature Guarantee stamp. A stamp that is not in this format is NOT an acceptable substitute. A witnessed, verified, or certified signature or a notarization by a notary public is NOT an acceptable substitute for a Medallion Signature Guarantee, nor can we accept a comparison signature guarantee, a handwritten signature guarantee, or a non-Medallion Signature Guarantee stamp.

Receiving Your Money

If you would like the proceeds of your redemption to be sent to an address, or made payable to a payee which is different from the address or payee information we have on record, please notify PNC Funds in writing and include a Medallion Signature Guarantee from a bank or other financial institution (see "Signature Guarantee" above).

Redemption requests will be processed at the next NAV determined after the Fund receives your request in good order, less any applicable deferred sales charge. Good order, among other things, means that complete information is provided about your sale request.

Except as noted below, for redemption requests received in good order, we will typically pay out redemption proceeds on the next business day regardless of the method used to make such payment. We may, however, take up to seven days to make redemption payments. A Fund may make redemption payments to different shareholders at different times for redemption requests received on the same day. Your proceeds can be wired to your bank account or sent to you by check. PNC Funds does not charge a fee to wire your funds; however, your financial intermediary may charge a fee.

Redemption requests may be funded from various sources, including Fund portfolio holdings of cash or cash equivalents, sale of portfolio securities, short-term investments, interest, dividend income and other monies earned on portfolio

investments, the proceeds from the sale or maturity of portfolio holdings, repurchase agreements, and borrowings (including overdrafts from the custodian bank, under the Fund's line of credit, and/or through a Fund's Interfund Lending program, as applicable). Under normal conditions, we typically expect to pay redemption proceeds in cash. Each Fund, however, has the right to use assets other than cash for redemption payments and is more likely to use non-cash assets to meet redemption requests during times of deteriorating market conditions or market stress, in cases where PNC Funds believes there are redemption requests representing a very significant portion of the Fund's outstanding shares or where a significant portion of the Fund's portfolio is comprised of less-liquid securities. Some Funds may be limited in their ability to use assets other than cash to meet redemption requests due to restrictions on ownership of their portfolio assets. More information is contained in the section "Redemptions in Kind" below.

In addition, if a Fund sells investments with extended settlement times, the settlement proceeds from the sales may not be available to meet the Fund's redemption obligations for a substantial period of time. In order to honor redemptions pending settlement of such investments, a Fund may employ a wide variety of means to meet short-term liquidity needs, including, without limitation drawing on its cash and other short-term positions or selling other investment positions with shorter settlement cycles, the sale of any or all of which may adversely affect the Fund's performance.

If you recently purchased your shares by check or through ACH, redemption proceeds or dividend accruals, if applicable, may not be available until your check or ACH transmission has cleared (which may take up to 15 business days from your date of purchase). If you recently changed your address, you will not be able to redeem your shares within 30 days after the change without a Medallion Signature Guarantee.

Redemptions in Kind

Redemption proceeds may be paid all or in part in securities (redemptions in kind) rather than cash at the Fund's discretion. Such in-kind distributions are typically a pro-rata portion of Fund portfolio assets (with certain adjustments, such as to avoid creating odd-lot positions), representative baskets of securities or a combination of individual securities, cash, and other investments. If your shares are redeemed in kind, you will have to pay transaction costs to sell any securities distributed to you, as well as taxes on any capital gains from the sale as with any redemption. Shareholders remain responsible for any loss in their accounts or any applicable taxes until their shares are redeemed.

Involuntary Redemption of Your Shares

If your account balance drops below \$1,000, you may be required to redeem your shares. But, we will give you or your financial intermediary at least 60 days' written notice to give

you time to add to your account and avoid the sale of your shares. The Funds reserve the right to redeem a shareholder's investment in a Fund without notice and send the proceeds to the shareholder's last address or account on record or the shareholder's financial intermediary. The Fund may do so if the shareholder's account no longer satisfies eligibility or minimum investment requirements established by the Fund or for other reasons the Fund determines are appropriate.

Suspension of Your Right to Redeem Your Shares

PNC Funds may suspend the right of redemption or postpone the date of payment for shares redeemed during any period when:

- (a) trading on the NYSE is restricted by applicable rules and regulations of the SEC;
- (b) the NYSE is closed for reasons other than customary weekend and holiday closings;
- (c) the SEC has by order permitted the Fund's suspension or postponement of redemptions;
- (d) an emergency exists, as determined by the SEC, as a result of which: (i) disposal by PNC Funds of securities owned by it is not reasonably practicable or (ii) it is not reasonably practicable for PNC Funds to determine the fair market value of its net assets; or
- (e) permitted by applicable law.

Telephone and Internet Transactions

Purchasing, exchanging, and redeeming Fund shares over the telephone or via the Internet is extremely convenient, but not without risk. Although the Funds' transfer agent has certain safeguards and procedures to confirm the authenticity of instructions, neither the Funds nor their transfer agent are responsible for any losses or costs incurred by following telephone or Internet instructions we reasonably believe to be genuine. If you or your financial institution transact with the Funds' transfer agent over the telephone or via the Internet, you will generally bear the risk of any loss.

Customer Identification Program

Federal regulations require the Funds to obtain your name, your date of birth (for a natural person), your residential address or principal place of business (as the case may be) and (if different) mailing address, and your Social Security number, employer identification number or other government-issued identification when you open an account. Additional information may be required in certain circumstances. Purchase applications without such information may not be accepted. If you have applied for an identification number, the application must be provided and the number submitted within a time period after the establishment of the account

deemed reasonable by the Funds. To the extent permitted by applicable law, the Funds reserve the right to place limits on transactions in your account until your identity is verified.

Cost Basis Reporting

When you redeem or exchange Fund shares that are held in a taxable account, the Fund or, if you purchase your shares through a financial intermediary, your financial intermediary generally is required to report to you and the Internal Revenue Service on an Internal Revenue Service Form 1099-B or other applicable form cost-basis information with respect to those shares, as well as information about whether any gain or loss on your redemption or exchange is short- or long-term and whether any loss is disallowed under the "wash-sale" rules. This reporting requirement is effective for Fund shares acquired by you (including through dividend reinvestment) on or after January 1, 2012, when you subsequently redeem or exchange those shares. Such reporting generally is not required for shares held in a Qualified Plan or other tax-advantaged account. Cost basis is typically the price you pay for your shares (including reinvested dividends), with adjustments for certain commissions, wash-sales, organizational actions, and other items, including any returns of capital paid to you by the Fund in respect of your shares. Cost basis is used to determine your net gains and losses on any shares you redeem or exchange in a taxable account.

A Fund or your financial intermediary, as applicable, will permit you to select from a list of alternative cost basis reporting methods to determine your cost basis in Fund shares acquired on or after January 1, 2012. If you do not select a particular cost basis reporting method, the Fund or financial intermediary will apply its default cost basis reporting method to your shares. If you hold your shares directly in a Fund account, the Fund's default method (or the method you have selected by notifying the Fund) will apply; if you hold your shares in an account with a financial intermediary, the intermediary's default method (or the method you have selected by notifying the intermediary) will apply. Please see the Funds' website at pncfunds.com, contact the Funds at 1-800-622-FUND (3863), or consult your financial intermediary, as appropriate, for more information on the available methods for cost basis reporting and how to select or change a particular method. You should consult your tax advisor concerning the application of these rules to your investment in a Fund, and to determine which available cost basis method is best for you. Please note that you are responsible for calculating and reporting your cost basis in Fund shares acquired prior to January 1, 2012 as this information will not be reported to you by the Fund and may not be reported to you by your financial intermediary.

DIVIDENDS AND TAX ASPECTS OF INVESTING IN THE FUNDS

Dividends from net investment income are declared and paid as follows:

Fund Name	
Emerging Markets Equity Fund	Annually
International Growth Fund	Annually

Each Fund makes distributions of net realized capital gains, if any, at least annually. If you own Fund shares on a Fund's record date, you will be entitled to receive the corresponding distribution. You will receive distributions in the form of additional Fund shares unless you elect to receive payment in cash. You may change your distribution options directly through the Internet at pncfunds.com or by notifying the transfer agent in writing prior to the date of the distribution. Your election will be effective as soon as your written notice is processed.

The following is a summary of certain U.S. federal income tax considerations generally applicable to investments in the Funds under current law, which is subject to change in the future. Except where otherwise indicated, the discussion relates to investors who are U.S. citizens or residents.

You should consult your tax advisor for further information regarding federal, state, local, and/or foreign tax consequences relevant to your specific situation. Each Fund intends to qualify and be treated each year as a regulated investment company. A regulated investment company generally is not subject to tax at the fund level on income and gains from investments that are distributed to shareholders. However, a Fund's failure to qualify as a regulated investment company would result in Fund-level taxation and, consequently, a reduction in income available for distribution to you.

Tax-Advantaged Accounts as Shareholders

Class R6 Shares of the Funds are offered primarily to Qualified Plans, which are tax-advantaged accounts for U.S. federal income tax purposes. Qualified Plans generally are not subject to U.S. federal income tax on distributions from a Fund or on redemptions of shares of a Fund. Special tax rules apply to investments through Qualified Plans. Plan participants whose Qualified Plan invests in a Fund generally are not subject to U.S. federal income tax on distributions from the Fund that are received by the Qualified Plan or on redemptions of the Fund's shares by the Qualified Plan. Distributions from a Qualified Plan to plan participants generally are taxable to those participants as ordinary income, with certain exceptions (for example, distributions from a Roth 401(k) plan generally are not taxable to participants in such a plan).

Whether you are investing through a Qualified Plan or through another type of tax-advantaged plan or account, you should consult with your own tax advisor and your plan

administrator or other designated financial intermediary to determine the suitability of a Fund as an investment through such plan or account and the specific U.S. federal income, as well as any possible state, local, foreign or other, tax consequences to you of investing in a Fund through your plan or account.

Fund Distributions – Taxable Shareholders

Each Fund intends to distribute each year all or substantially all of its net investment income and capital gains, including its net capital gain (the excess of long-term capital gain over short-term capital loss, in each case determined with reference to any loss carryforwards). You will be subject to federal income tax on Fund distributions in the manner described herein, regardless of whether they are paid in cash or reinvested in additional shares. Although dividends are generally treated as taxable to you in the year they are paid, dividends declared and payable to shareholders of record in October, November, or December but paid in the following January are taxable as if they were paid on December 31 of the year in which they were declared.

Distributions of investment income (other than exempt-interest dividends, if any, described below) and gains from the sale of investments that a Fund owned (or is deemed to have owned) for one year or less will generally be taxable to you at ordinary income rates. Distributions of net capital gains (that is, the excess of net capital gains from the sale of investments that a Fund owned for more than 12 months over net short-term capital losses) that are properly reported by the Fund as capital gain dividends ("capital gain dividends") will generally be taxable to you as long-term capital gain includible in net capital gain and taxable to individuals at reduced rates, regardless of how long you have held your shares. You will be notified annually of the tax status of distributions paid to you.

Distributions of investment income properly reported by a Fund as derived from "qualified dividend income" will generally be taxable to you at the rates applicable to long-term capital gain, provided holding period and other requirements are met at both the shareholder and Fund levels. Certain of a Fund's investment activities, such as investments in debt securities, securities lending activities, if any, high portfolio turnover, or investments in "non-qualified" foreign corporations will result in a lesser amount of the Fund's distributions qualifying for this favorable tax treatment than if the Fund had not conducted such activities. Also, if a Fund receives dividends from a regulated investment company in which the Fund invests (an "Underlying RIC"), and the Underlying RIC reports such dividends as "qualified dividend income," then the Fund is permitted, in turn, to report a portion of its distributions as "qualified dividend income," provided the Fund meets the holding period and other requirements with respect to shares of the Underlying RIC. See the Statement of Additional Information for a description of the requirements necessary for this favorable tax treatment to apply.

A portion of the Funds' dividends paid to corporate shareholders may be eligible for the dividends-received deduction, provided holding period and other requirements are met at both the shareholder and Fund levels. Certain of a Fund's investment activities, such as investments in debt securities, securities lending activities, if any, high portfolio turnover rate, or investments in foreign corporations will result in a smaller portion of the Fund's distributions qualifying for the dividends-received deduction than if the Fund had not conducted such activities. Also, if a Fund receives dividends from an "Underlying RIC," and the Underlying RIC reports such dividends as eligible for the dividends-received deduction, then the Fund is permitted, in turn, to report a portion of its distributions as eligible for the dividends-received deduction, provided the Fund meets the holding period and other requirements with respect to shares of the Underlying RIC. PNC International Growth Fund and PNC Emerging Markets Equity Fund each expect that no substantial portion of its distributions will be eligible for the dividends-received deduction.

A Fund may be eligible to report a portion of its distributions as exempt-interest dividends, which are not generally taxable to Fund shareholders for U.S. federal income tax purposes, but may be subject to state and local taxes and may result in liability for the federal alternative minimum tax. If, at the close of each quarter of a Fund's taxable year, either (a) at least 50% of its total assets consists of obligations the interest on which is exempt from U.S. federal income tax under Section 103(a) of the Code or (b) at least 50% of its total assets consists of interests in Underlying RICs, the Fund will be permitted to distribute exempt-interest dividends and thereby pass through to its shareholders the tax-exempt character of any exempt-interest dividends it receives from Underlying RICs, and of interest on any tax-exempt obligations in which it directly invests, if any.

A 3.8% Medicare contribution tax will be imposed on the "net investment income" of certain individuals, estates, and trusts to the extent their income exceeds certain threshold amounts. Net investment income generally includes for this purpose dividends paid by a Fund, including any capital gain dividends but excluding any exempt-interest dividends (described below), and net capital gains recognized on the sale, redemption, exchange, or other taxable disposition of shares of a Fund. Shareholders are advised to consult their tax advisors regarding the possible implications of this additional tax on their investment in a Fund.

You should note that if you purchase shares just before a distribution, the purchase price will reflect the amount of the upcoming distribution. However, you will be taxed on the entire taxable portion of the distribution received, even though, as an economic matter, all or a portion of the distribution constitutes a return of capital. This tax result is known as "buying into a dividend."

Redemptions or Exchanges – Taxable Shareholders

You will generally recognize taxable gain or loss for federal income tax purposes on a sale, exchange, or redemption of your shares in any Fund, including an exchange for shares of another Fund, based on the difference between your tax basis in the shares and the amount you receive for them. Generally, you will recognize long-term capital gain or loss if you have held your Fund shares for over twelve months at the time you dispose of them and will recognize short-term capital gain or loss if you have held your Fund shares for twelve months or less at the time you dispose of them. As described under "Cost Basis Reporting" above, upon the sale, exchange, or redemption of Fund shares, the Fund or, in the case of shares purchased through a financial intermediary, the financial intermediary may be required to provide you and the Internal Revenue Service with cost basis and certain other related tax information about the Fund shares you sold, redeemed, or exchanged. To aid in computing your tax basis, you generally should retain your account statements for the periods during which you held shares.

Any loss realized on shares held for six months or less will be treated as a long-term capital loss to the extent of any capital gain dividends that were received on the shares. Additionally, all or a portion of any loss realized on a disposition of shares of a Fund will be disallowed under the "wash-sale" rules if other shares of the same Fund are purchased within 30 days before or after the disposition, such as pursuant to a dividend reinvestment in shares of a Fund. If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares purchased.

Investments in other Regulated Investment Companies

A Fund's investments in shares of an Underlying RIC can cause the Fund to be required to distribute greater amounts of net investment income or net capital gain than the Fund would have distributed had it invested directly in the securities held by the Underlying RIC, rather than in shares of the Underlying RIC. Further, the amount or timing of distributions from the Fund qualifying for treatment as a particular character (e.g., long-term capital gain, exempt interest, eligibility for dividends-received deduction, etc.) will not necessarily be the same as it would have been had the Fund invested directly in the securities held by the Underlying RIC.

Investments in Certain Debt Instruments and Derivatives

Certain of a Fund's investments, including certain debt instruments, derivatives, options, futures, forwards, and swaps, could affect the amount, timing, and character of distributions you receive and could cause the Fund to recognize taxable income in excess of the cash generated by such investments (which may require the Fund to liquidate other investments, including when not otherwise advantageous to do so, in order to make required distributions).

Investments in Foreign Securities and Foreign Taxes

A Fund's investments in foreign securities (including fixed income securities and derivatives) or foreign currencies may increase or accelerate the Fund's recognition of ordinary income and may affect the timing, amount, or character of the Fund's distributions. A Fund's investments in foreign securities may be subject to foreign withholding or other taxes, which can decrease the Fund's yield on such securities. If more than 50% of the value of a Fund's total assets at the close of a taxable year consists of securities of foreign corporations, the Fund will be eligible to elect to permit shareholders to claim a credit or deduction on their income tax returns for their pro rata portion of qualified taxes paid by the Fund to foreign countries in respect of foreign securities the Fund has held for at least a minimum period specified by the applicable tax rules. Alternatively, if at the close of each quarter of a Fund's taxable year, at least 50% of its total assets consists of interests in Underlying RICs, the Fund will be a "qualified fund of funds." In that case, the Fund is permitted to elect to pass through to its shareholders foreign income and other similar taxes paid by the Fund in respect of foreign securities held directly by the Fund or by an Underlying RIC in which the Fund invests that itself elected to pass such taxes through to shareholders, so that shareholders of the Fund will be eligible to claim a tax credit or deduction for such taxes. In either case, even if the Fund qualifies to make such an election for any year, it may determine not to do so. See the Statement of Additional Information for additional information regarding such credits.

Investments in Commodities and Commodity-Related Instruments

In order to qualify for the special tax treatment accorded regulated investment companies and their shareholders, a Fund must, among other things, derive at least 90% of its gross income from certain specified sources (such income, "qualifying income"). Direct investment in commodities and certain commodity-related instruments generally do not, under published Internal Revenue Service guidance, produce qualifying income. Each Fund obtaining exposure to the commodities markets intends to do so by investing directly in commodity-related instruments that the Fund believes give rise to qualifying income or otherwise in such a manner that it satisfies the 90% qualifying income requirement, or indirectly through its investment in a wholly owned subsidiary organized under the laws of a foreign jurisdiction that, in turn, would invest in commodity-related instruments. Under the tax diversification requirements described in the Statement of Additional Information, a Fund may not invest more than 25% of its total assets in such subsidiaries. Any such subsidiary will intend to operate in such a manner that the 90% qualifying income requirement is satisfied in respect of a Fund

investing in such subsidiary. The tax treatment of investing in commodity-related instruments and in a subsidiary is currently under consideration and may be adversely affected by future legislation, Treasury Regulations, and/or guidance issued by the Internal Revenue Service, which legislation, Treasury Regulations, and/or guidance may have retroactive effect. See "Tax Status Risk" above for further discussion of potential tax risks of a Fund's commodity and commodity-related investments.

It is expected that any such subsidiary generally will not be subject to U.S. federal income tax. It will, however, be considered a controlled foreign corporation for U.S. federal tax purposes, and a Fund investing in such subsidiary will be required to include in its income annually amounts earned by the subsidiary during that year, regardless of whether such income is distributed by the subsidiary to the Fund. Gains from the sales of investments by the subsidiary will not be eligible for capital gain treatment, but instead will be treated as ordinary income when included in income by the Fund.

Backup Withholding

A Fund may be required in certain cases to withhold and remit to the Internal Revenue Service a percentage of taxable distributions or gross proceeds realized upon redemption of Fund shares payable to shareholders who fail to provide to the Fund a correct tax payer identification number in the manner required, who have under-reported dividend or interest income, or who fail to certify to the Fund that they are not subject to backup withholding. The backup withholding rate is 28%.

IRAs and Other Tax-Advantaged Accounts

IRAs, tax-qualified retirement plans, and certain other tax-advantaged accounts generally are not subject to U.S. federal income tax on distributions from a Fund or on redemptions of shares of a Fund. Special tax rules apply to investments through such accounts. Investors in a Fund through such tax-advantaged accounts generally are not subject to U.S. federal income tax on distributions from the Fund that are received by the account or on redemptions of the Fund's shares held in the account. Distributions from a tax-advantaged account generally are taxable to the recipient as ordinary income, with certain exceptions (for example, distributions from a Roth 401(k) plan generally are not taxable to participants in such a plan).

If you are investing through a tax-advantaged account, you should consult with your own tax advisor and your plan administrator or other designated financial intermediary to determine the suitability of a Fund as an investment through such account and the specific U.S. federal income, as well as any possible state, local, foreign or other, tax consequences to you of investing in the Fund through the account.

U.S. Federal Tax Treatment of Foreign Shareholders

Investors that are not U.S. citizens or residents should consult their own tax advisors regarding the U.S. and non-U.S. tax consequences of an investment in a Fund.

State and Local Taxes

You may also be subject to state and local taxes on distributions and redemptions. State income taxes may not apply, however, to the portions of each Fund's distributions, if

any, that are attributable to interest on U.S. government securities or interest on securities of the particular state or localities within the state. You should consult your tax adviser regarding the tax status of distributions in your state and locality.

More information about taxes is in the Statement of Additional Information.

The tables that follow present performance information about Class I Shares of each Fund.

This information is intended to help you understand each Fund's financial performance for the past five years, or, if shorter, the period of the Fund's or share class's operations. All per share information reflects financial information for a single Fund share. The total returns in the table represent the rate that you would have earned (or lost) on an investment in a Fund, assuming you reinvested all of your dividends and distributions.

Because Class R6 shares had not commenced operations as of the date of this prospectus, such share class financial highlights are not presented; however, financial highlights for Class I shares are presented for each Fund. Returns would differ only

to the extent that Class R6 shares and Class I shares have different expenses.

The financial highlights for annual periods ended May 31 have been audited by Deloitte & Touche LLP, Independent Registered Public Accounting Firm, whose report, along with each Fund's financial statements, including any Notes to Financial Statements referenced in these financial highlights, is included in the annual reports dated May 31, 2018 and is incorporated by reference into the Statement of Additional Information.

You can obtain the Funds' annual reports, which contain more performance information, at no charge, by calling 1-800-622-FUND (3863) or online at pncfunds.com.

Selected Per Share Data and Ratios For the Years Ended May 31, unless otherwise indicated
