**INVESTMENT STRATEGY**

PNC Treasury Money Market Fund seeks to provide a high level of current income consistent with stability of principal and liquidity by investing exclusively in short-term direct obligations of the U.S. Treasury, such as Treasury bills and notes, and in other money market funds that invest exclusively in such obligations.

**INVESTMENT RISKS**

The dividend yield paid by PNC Money Market Funds will vary with changes in short-term interest rates. The value of debt securities within PNC Treasury Money Market Fund’s portfolio may be affected by the ability of the issuer to make principal and interest payments. The Fund is subject to counterparty risk, which is the risk that another party in an agreement may not fulfill its obligations under the agreement.

**3** Principal stability fund (money market fund) rating provided by S&P Global Ratings. The rating represents its opinions as to the credit quality of the securities it rates and not the shares of the Fund itself. Ratings are relative and subjective, are not absolute standards of quality, not recommendations to purchase, sell, or hold a security and are based on current unaudited financial information furnished to the rating agency by the Funds. For information on rating methodologies, please visit the agency website at [https://www.standardandpoors.com/en\\_US/web/guest/home](https://www.standardandpoors.com/en_US/web/guest/home). Ratings are measured on a scale that ranges from AAAm (highest) to Dm (lowest).

**4** National Association of Insurance Commissioners (NAIC) is a U.S. organization of insurance regulators. NAIC Designations are used by the NAIC Securities Valuation Office to denote a category of credit quality, ranging from NAIC level 1 (highest quality) to NAIC level 6 (lowest quality). NAIC 1, further designated as either ‘U.S. Direct Obligations/Full Faith and Credit Exempt’ (“Exempt List”) or ‘Other’, is assigned to obligations exhibiting the highest quality with credit risk at its lowest and the issuer’s credit profile is stable. The Fund is included in the Exempt List. NAIC Level 6 is assigned to obligations that are in or near default. This means that payment of interest, principal or both is not being made, or will not be made, in accordance with the contractual agreement. The NAIC designations are not an endorsement and should not be considered by non-members in their investment decisions. For more information on the methodology visit [www.naic.org](http://www.naic.org).

**5** Credit Quality Composition is for illustration purposes only and are not a permanent reflection of the Fund. Credit Quality Composition ratings reflect S&P Short Term Issuer Debt ratings. A Standard & Poors issuer credit rating is a forward-looking opinion about an obligor’s overall creditworthiness. This opinion focuses on the obligor’s capacity and willingness to meet its financial commitments as they come due. It does not apply to any specific financial obligation, as it does not take into account the nature of and provisions of the obligation, its standing in bankruptcy or liquidation, statutory preferences, or the legality and enforceability of the obligation.
