1 Net operating expenses reflect contractual waivers and expense reimbursements that continue through the end of September 2018. For more information on fee waivers or expense reimbursements please see the expense table in the prospectus. If the waivers or reimbursements were not in effect the Fund’s performance would have been lower.

2 The MSCI ACWI ex USA Index captures large- and mid-cap representation across 22 of 23 Developed Markets (DM) countries (excluding the US) and 23 Emerging Markets (EM) countries. With 1,859 constituents, the index covers approximately 85% of the global equity opportunity set outside the U.S.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. POP (Public Offering Price) figures reflect maximum sales charge in class A shares of 5.50%. NAV (Net Asset Value) returns do not include the effect of any applicable sales charges. Current performance may be lower or higher than that shown here. Performance data current to the most recent month-end is available at 800-622-FUND (3863) or pncfunds.com.

⁹ Data is for illustration purposes only as they are not a permanent reflection of fund composition and is subject to change at any time. Top Ten Holdings are calculated based on fund net assets. Country weightings are calculated based on the total net assets of total investments and notional market value of derivative contracts. Notional derivative contracts, such as equity index futures, will be allocated to the country of representative exposure.

CALENDAR YEAR TOTAL NAV RETURNS

3 Number of Securities includes futures, forwards, ETF's, and other cash-like securities.

4 Measure of the price paid for a share relative to the income or profit earned by the firm per share.

5 Statistical measure of volatility, calculating the average deviation of a return series from its mean.

6 Measure of risk-adjusted performance, considering the risk due to the specific security.

7 Quantitative measure of the volatility of a fund relative to the MSCI ACWI ex USA Index².

8 Risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk.

INVESTMENT STRATEGY

PNC International Equity Fund seeks to provide long-term capital appreciation. The Fund aims to achieve this objective by primarily investing in equity securities that are economically tied to a number of countries throughout the world. The Fund uses a multifaceted approach of blending value and growth portfolios, currently with approximately 50% of the fund's assets allocated to the PNC Capital Advisors international equity team and approximately 50% to the Polaris Capital Management team.

The Fund limits investments in securities of issuers in countries with developing markets to no more than 25% of the Fund's total assets. More than 25% of the Fund's assets may be invested in the equity securities of issuers located in the same country.

INVESTMENT RISKS

International investments are subject to special risks not ordinarily associated with domestic investments, including currency fluctuations, economic and political change, and differing accounting standards that may adversely affect portfolio securities. These risks may be heightened in emerging markets. Investments in value companies can continue to be undervalued for long periods of time and be more volatile than the stock market in general. Investments in growth companies can be more sensitive to the company's earnings and more volatile than the stock market in general. Investments in small- and mid-capitalization companies present a greater risk of loss than investments in large companies. The Fund may invest a portion of its assets in derivatives. Derivative instruments include options, futures, and options on futures. A small investment in derivatives could have a potentially large impact on the Fund's performance. The Fund may be unable to terminate or sell a derivatives position. Derivative counterparties may suffer financial difficulties and may not fulfill their contractual obligations.

4 stars out of 330 funds

5-Year Rating
4 stars out of 289 funds

10-Year Rating
4 stars out of 206 funds

3-Year Rating
4 stars out of 330 funds

5-Year Rating
4 stars out of 289 funds

10-Year Rating
3 stars out of 206 funds

The overall Morningstar rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar metrics.

The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. **Ratings are for the share class shown; other classes may vary.**
