1 Net operating expenses reflect contractual waivers and expense reimbursements that continue through the end of September 2018. For more information on fee waivers or expense reimbursements please see the expense table in the prospectus. If the waivers or reimbursements were not in effect the Fund's performance would have been lower.

2 The Russell 2000 Index, an unmanaged index of companies widely representative of small-capitalization companies based on market capitalization, is not available for direct investment. Unlike a mutual fund, the performance of an index assumes no taxes, transaction costs, management fees, or other expenses.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. POP (Public Offering Price) figures reflect maximum sales charge in class A shares of 5.50%. NAV (Net Asset Value) returns do not include the effect of any applicable sales charges. A contingent deferred sales charge of 1.00% is charged if redeem Class C Shares within 12 months of the date of purchase. Current performance may be lower or higher than that shown here. Performance data current to the most recent month-end is available at 800-622-FUND (3863) or pncfunds.com.

PORTFOLIO CHARACTERISTICS AND RISK STATISTICS (3 YEAR PERIOD)

9 Sector Weightings and Top Ten Holdings are a percent of total net assets, calculated based on Fund net assets, and are subject to change. As such, they are for illustrative purposes only as they are not a permanent reflection of Fund composition.

CALENDAR YEAR TOTAL NAV RETURNS

3 Number of Securities includes futures, forwards, ETFs, and other cash-like securities.

4 Measure of the price paid for a share relative to the income or profit earned by the firm per share.

5 Statistical measure of volatility, calculating the average deviation of a return series from its mean.

6 Measure of risk-adjusted performance, considering the risk due to the specific security.

7 Quantitative measure of the volatility of a fund relative to the Russell 2000 Index².

8 Risk-adjusted measure calculated using standard deviation and excess return to determine reward per unit of risk.

FIRSTSERVICE CORP	2.95%
EXPONENT INC	2.92%

INVESTMENT STRATEGY

PNC Small Cap Fund seeks capital appreciation by investing in a diversified portfolio of publicly traded small-cap U.S. equity securities with market caps matching the benchmark that may possess either value or growth characteristics.¹⁰ The Fund's managers invest in companies based upon their Cash Flow Return on Investment (CFROI®). CFROI is an inflation-adjusted measure of corporate performance that attempts to reduce accounting distortions and allow for more accurate comparisons between companies, different market caps, sectors, and industries. The Fund's managers believe that CFROI provides a more accurate predictor of future value than other broadly used analysis methods.

¹⁰ The market cap range of the benchmark frequently changes. As a result, the capitalization of companies in which the Fund invests may also change.

INVESTMENT RISKS

Investments in small-capitalization companies present a greater risk of loss than investments in large companies due to greater volatility and less liquidity. Investments in value companies can continue to be undervalued for long periods of time and be more volatile than the stock market in general. Investments in growth companies can be more sensitive to the company's earnings and more volatile than the stock market in general. International investments are subject to special risks not ordinarily associated with domestic investments, including currency fluctuations, economic and political change, and differing accounting standards that may adversely affect portfolio securities. These risks may be heightened in emerging markets.

Effective May 17, 2018, PNC Small Cap Fund reopened to new investors.
