1 Net operating expenses reflect contractual waivers and expense reimbursements that continue through the end of September 2018. For more information on fee waivers or expense reimbursements please see the expense table in the prospectus. If the waivers or reimbursements were not in effect the Fund's performance would have been lower.

2 Since there are no class R shares outstanding since inception date of 2/29/16, performance shown for class R shares is based on the returns of the Fund's class I shares and is not adjusted to reflect the expenses of class R shares.

3 The MSCI ACWI ex USA Growth Index captures large- and mid-cap securities exhibiting overall growth style characteristics across developed (excluding the U.S. and Canada) and emerging market countries.

Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. POP (Public Offering Price) figures reflect maximum sales charge in class A shares of 5.50%. NAV (Net Asset Value) returns do not include the effect of any applicable sales charges. Current performance may be lower or higher than that shown here. Performance data current to the most recent month-end is available at 800-622-FUND (3863) or pncfunds.com.

INVESTMENT STRATEGY

PNC International Growth Fund seeks to provide long-term capital appreciation. The Fund aims to achieve this objective by primarily investing in equity securities that tied economically to a number of countries throughout the world. The Fund uses a top-down/bottom-up approach that results in a diversified portfolio that is flexible to market conditions. Performance is driven primarily by owning companies with strong earnings growth within international markets which are poised to outperform.

INVESTMENT RISKS

International investments are subject to special risks not ordinarily associated with domestic investments, including currency fluctuations, economic and political change, and differing accounting standards that may adversely affect portfolio securities. These risks may be heightened in emerging markets. To the extent that the Fund invests directly in foreign currencies or in securities that trade in, and pay revenues in, foreign currencies, or derivatives that provide exposure to foreign currencies, the Fund will be exposed to the risk that the currencies will decline in value relative to the U.S. dollar, or, in the case of hedging positions, that the U.S. dollar will decline in value relative to the hedged currency. Investments in growth companies can be more sensitive to the company's earnings and more volatile than the stock market in general. The Fund may invest a portion of its assets in derivatives. Derivative instruments include options, futures, and options on futures. A small investment in derivatives could have a potentially large impact on the Fund's performance. The Fund may be unable to terminate or sell a derivatives position. Derivative counterparties may suffer financial difficulties and may not fulfill their contractual obligations.
