- 1 Bond investments are subject to interest rate risk such that when interest rates rise, the prices of bonds and the value of bond fund shares can decrease and the investor can lose principal value. The Fund may be subject to prepayment risk, the risk that the principal of a fixed income security that is held by the Fund may be prepaid prior to maturity, potentially forcing the Fund to reinvest that money at a lower interest rate.
- 2 Investments in small- and mid-capitalization companies present greater risk of loss than investments in large companies, due to greater volatility and less liquidity.
- 3 International investments are subject to special risks not ordinarily associated with domestic investments, including currency fluctuations, economic and political change, and differing accounting standards that may adversely affect portfolio securities. These risks may be heightened in emerging markets.
- 4 Each fund may invest a portion of its assets in derivatives. Derivative instruments include options, futures, and options on futures. A small investment in derivatives could have a potentially large impact on the Fund's performance. The use of derivatives involves risks different from the risks associated with investing directly in the underlying assets. Derivatives can be volatile, illiquid, and difficult to value, and an imperfect correlation may exist between changes in the value of a derivative held by the Fund and the Fund's other investments.
- 5 High yield bond investing includes special risks. Investments in lower-rated and unrated debt securities are subject to a greater loss of principal and interest than investments in higher-rated securities. The values of mortgage-backed securities depend on the credit quality and adequacy of the underlying assets or collateral and may be highly volatile.
- 6 May be subject to the federal Alternative Minimum Tax (AMT). Intermediate Tax Exempt Bond Fund may also be subject to state and local taxes. Federal income tax rules will apply to any capital gains distributions.
- 7 Investments in growth companies can be more sensitive to the company's earnings and more volatile than the stock market in general.
- 8 Investments in value companies can continue to be undervalued for long periods of time and be more volatile than the stock market in general.
- 9 You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time. The dividend yield paid by each Fund will vary with changes in short-term interest rates.
- 10 Effective May 17, 2018, PNC Small Cap Fund reopened to new investors.
- 11 Emerging Markets investments are subject to special risks because frontier markets are among the smallest, least mature and least liquid of the emerging markets, investments in frontier markets generally are subject to a greater risk of loss than investments in developed markets or traditional emerging markets. The Fund's investments in securities that are or become illiquid may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price.
- 12 On March 1, 2018 PNC Advantage Funds (the "Trust") reorganized PNC Advantage Institutional Treasury Money Market Fund (the "Fund") into PNC Treasury Plus Money Market Fund, a newly created series of PNC Funds, a Delaware statutory trust (the "PNC Funds Trust"). PNC Treasury Plus Money Market Fund has principal investment strategies identical to those of the Fund and is managed by the same investment adviser and portfolio management team as the Fund. In addition, the respective share classes of PNC Treasury Plus Money Market Fund assumed the performance, financial and other historical information of the Fund.
- 13 At a meeting held on August 28, 2018, the Board of Trustees of PNC Funds approved the reorganization (the "Reorganization") of PNC Intermediate Bond Fund ("Bond Fund") into PNC Total Return Advantage Fund ("Advantage Fund"). If the Reorganization is completed as proposed, each shareholder of the Bond Fund would become a shareholder in the Advantage Fund. The Reorganization is subject to a number of conditions, including approval by a vote of the Bond Fund's shareholders, and the terms of the agreement and plan of reorganization approved by the Board.
- 14 Although U.S. government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates, and bond fund prices may decline as interest rates rise.
- 15 An investment in municipal obligations is subject to municipal securities risk. Changes in the local or national economy and business or political conditions relating to a particular municipal project, municipality, or state in which the Fund invests may make it difficult for the municipality to make interest and principal payments when due and thus could decrease the value of the Fund's investments in municipal bonds.

Mutual funds involve risk, including possible loss of principal.
