Dear Shareholders:

We are pleased to present this annual report for PNC Money Market Funds for the twelve months ended May 31, 2017 (the “annual period”).

Please note that in connection with the July 2014 amendments to Rule 2a-7 under the Investment Company Act of 1940 (the “Amended Rule”), which is the primary rule governing the operation of money market funds, the final deadline passed during the annual period for money market funds to be compliant with certain requirements of the Amended Rule. As of October 14, 2016, PNC Money Market Funds are in compliance with all requirements of the Amended Rule. Further, PNC Capital Advisors, LLC (the “Adviser”) manages PNC Government Money Market Fund, PNC Treasury Money Market Fund and PNC Advantage Institutional Treasury Money Market Fund, so that on and after October 14, 2016, each qualifies as a “government money market fund” under the Amended Rule, enabling each to continue to seek to maintain a stable net asset value (“NAV”) per share of one dollar.

Before reviewing the financial statements and schedules of investments of your individual mutual fund investments, it may be useful to take a brief look at the major factors affecting the economy and the money markets during the annual period.

Economic Review

The U.S. economy improved during the annual period despite spikes of volatility in the capital markets. Indeed, the domestic economy had already been on the upswing prior to the U.S. elections and may have received further stimulus through enhanced expectations of a unified, more business-friendly government at the federal level. U.S. Gross Domestic Product (“GDP”) jumped to a 3.5% annualized rate in the third quarter of 2016 from an approximately 1% growth rate in the first half of 2016. U.S. GDP then posted a 2.1% increase in the fourth quarter of 2016 before slowing to a 1.2% pace in the first quarter of 2017. While sluggish in comparison to the two prior quarters, it is worth noting that the U.S. economy has been growing since the Great Recession ended in June 2009, making this expansion the third longest in history. Also, during the first quarter of 2017, consumer confidence and expectations about the economy, as measured by the Conference Board, were at their highest levels since 2000. Small-business confidence, as measured by the National Federation of Independent Business survey, was at its highest level since the mid-2000s. After the U.S. administration was unsuccessful in its first attempt to pass a healthcare bill in the spring of 2017, investors became concerned about its ability to enact legislation on that and other proposed initiatives. Still, at the end of May 2017, the unemployment rate stood at 4.3%. Non-farm payrolls were increasing, and wage gains were slowly rising. Retail sales had picked up pace in April 2017, suggesting the stagnation in private spending seen in the first quarter of 2017 might have been temporary. Industrial production surged, recording the largest expansion in more than three years in April on higher core manufacturing and mining output. Most analysts agreed at the end of the annual period that U.S. GDP growth was poised to come in at a stronger rate for the second quarter of 2017 despite political storms buffeting the current administration.

Given the strength of U.S. economic data post the November 2016 elections, as well as the firming of inflation statistics, the Federal Open Market Committee (the “Fed”) voted to raise the targeted fed funds rate 25 basis points in March 2017, as it had in December 2016, bringing it to a range of 0.75% to 1.00%. (A basis point is 1/100th of a percentage point.)

Looking abroad, the world economy similarly picked up. However, while the Fed began tightening its monetary policy, the accommodative monetary stance from the European Central Bank and the Bank of Japan remained in place. Europe’s economy surprised to the upside due to cyclical factors in spite of political uncertainties, and the emerging markets’ economies overall rebounded after several years of stagnation due to weak commodity prices and increased corporate earnings expectations. Further, in notable countertrends to the populism surge, Austria, the Netherlands and France saw their respective populist, hard-right candidates lose their bids for the presidency and parliamentary majorities, as applicable. Eurozone retail sales picked up, and unemployment fell, although there was great diversion among individual countries. For example, German unemployment was below 4% in the first quarter of 2017, while French unemployment stood at 10%, and Spanish unemployment was approximately 18%. China continued on its government-targeted 6% to 7% growth path during the annual period.

“...consumer confidence and expectations about the economy...were at their highest levels since 2000.”

LETTER TO SHAREHOLDERS

“Yields...[edged] higher as investors priced in...the Fed’s interest rate hikes...”

A modestly weaker currency against the U.S. dollar during 2016, coupled with expansionary policies in much of last year, led to somewhat more stabilized growth year-to-date through May 2017. Against a backdrop of strengthening global demand, the People’s Bank of China gradually tightened its monetary conditions in the early months of 2017, raising its repurchase agreement rate in concert with the Fed’s March interest rate increase. Japan, by contrast, remained on its slow growth rate despite the extraordinary monetary accommodation by the Bank of Japan. While its 3% unemployment rate was the lowest it had been since the mid-1990s, cash earnings and consumption were up only modestly.

Money Markets

Yields in the taxable and tax-exempt money markets remained extremely low throughout the annual period but did edge higher as investors priced in the potential, and then the reality, of the Fed’s interest rate hikes in December 2016 and March 2017 and the anticipation of another increase in June 2017.

The first Fed meeting during the annual period occurred in June 2016. Although the Fed’s subsequent statement was marginally dovish, or implying lower interest rates for longer, and economic data estimates for GDP, inflation and unemployment were largely unchanged, the fed funds forecasts shifted in a materially dovish way. Median projections for 2017-2018 as well as the long-term fed funds rate estimate all came down. During the third calendar quarter, yields on traditional money market instruments rose, as Fed guidance and market expectations of future policy rates better aligned. The Fed’s September 2016 meeting was a “close call,” marking the first time in five years that three members dissented on the no action decision. Despite the division in opinions and the hawkish tone of the statement, Fed Chair Yellen suggested in her press conference that the labor market had continued room for improvement and that she did not feel the economy risked overheating. Overall, total money market assets remained unchanged during the first half of the annual period, although assets streamed out of prime money market funds and into government money market funds ahead of the mid-October 2016 compliance date of the Amended Rule requirements.

In November 2016, the surprise results of the U.S. presidential election were widely viewed as a potential regime change in fiscal policy. The U.S. Treasury yield curve steepened, as the markets began pricing in higher inflation due to greater anticipated government fiscal spending. In December 2016, in a move widely expected by the markets, the Fed raised interest rates for the second time since the 2008 global financial crisis. Fed policymakers also raised their interest rate projections on the back of continued improvement in the U.S. labor market, rising wages and the potential of fiscal policy initiatives by the new administration. After the December 2016 policy meeting, market expectations increased for additional Fed rate hikes in 2017 and money market yields generally moved higher.

Beginning in late February 2017, the Fed’s more hawkish commentary acted to reorient market expectations toward a March 2017 increase in the fed funds rate. Financial markets remained resilient, and the Fed capitalized on the opportunity for an additional policy tightening at its March meeting. The Fed left much of its forward guidance and economic projections unchanged from its December 2016 meeting. At the end of the annual period, Fed participants still expected on average two more rate increases in 2017, largely due to the possibility of a fiscal stimulus package and the consensus’ anticipation of continued improvement in the labor market along with rising wages. This expectation was partially realized as the Fed increased the targeted fed funds rate by another 0.25% at its June 2017 meeting.

Our View Ahead

At the end of the annual period, we believed the U.S. and international economies would likely continue on a path of modest acceleration and expansion in part due to stimulative monetary policies. Emerging markets, too, should see better growth, in our view, as strong consumer demand emanating from both the developed markets and emerging markets themselves are likely to help buoy world growth. Of course, volatility in oil and other commodity prices remain a key variable.

At the end of the annual period, the Fed appeared more determined to proceed with its monetary policy normalization process uninterrupted in 2017. With U.S. economic growth seemingly

*Commentary provided by

LETTER TO SHAREHOLDERS

on better footing, the unemployment rate at or near full employment, and the inflation rate approaching the 2% target, Fed officials have been reinforcing their desire to return both interest rates and the Fed's balance sheet back toward "normal" levels. The capital markets have been generally positive about the moderate pace of Fed tightening.

That said, the sector and style rotation we saw in the equity and other "risk on" markets in the first several months of 2017 gives us some pause in our market outlook. We have gone through an extended period of little to no correction in the equity markets, making it seem as though we have been in an extraordinarily calm environment. Market participants know that such lengthy calm periods often give way to greater volatility.

The markets have been pricing in better earnings and better growth emanating from the current administration's desire for regulatory relief, corporate tax reform, personal tax cuts and fiscal spending through increased defense and infrastructure spending. However, given the lack of success on major legislative initiatives to date, markets likely will become, in our view, more skeptical of the administration's ability to deliver on the speed and magnitude of policy changes. In an environment where equity markets are priced on great expectations, we may be in store for some substantial volatility caused by political disappointment.

At the same time, bull markets rarely end quietly. Historically, healthy skepticism of the last stages of a bull market are overridden by investor euphoria. Being out of the market in those late stages can be costly. We are not forecasting an equity market bubble with an accelerating build-up and subsequent meltdown. Rather, we believe investors must reinsert equity market volatility back into their return expectations. We believe the market needs solid earnings growth to follow through in the second half of 2017 to better support its current lofty valuation levels.

One other factor to watch is upcoming changes to the Fed's membership, which may become a focal point for the money markets in light of evolving monetary policies. Both Fed Chair Yellen's chairmanship and Vice Chair Fischer's term expire in the first half of 2018; with three additional board vacancies (including that of Tarullo who recently resigned), President Trump could dramatically alter the Fed's composition.

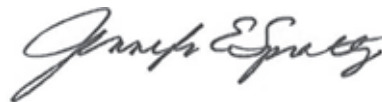

Vigilance remains paramount. We believe relative safety, diversification and liquidity will likely remain important and ongoing considerations for investors in the money markets. We therefore continue to believe that money market funds will continue to play a key role in investors' portfolios.

We thank you for being a part of the PNC Money Market Funds and for maintaining a long-term perspective as a basic tenet of your investment approach. We value your ongoing confidence in us and look forward to serving your investment needs in the years ahead.

Best Regards,

Mark McGlone

* For the seven-day period ended May 31, 2017, the Current Yield and Effective Yield for Government Money Market Fund and Treasury Money Market Fund were the same.

** Unsubsidized Yield reflects the yield without fee waivers and expense reimbursements in effect.

*** Ratios for the seven-day period rounded to 0.00%.

**** Net assets of Advisor Shares at May 31, 2017 were comprised solely of seed capital of \$10.

Performance quoted represents past performance and does not guarantee future results. Investment return will fluctuate, so current performance may be higher or lower than shown here. Current performance data is available at pncfunds.com.

EXPENSE TABLES (Unaudited)

The expenses shown in the Expense Tables are meant to highlight your ongoing costs only and do not reflect any transactional costs. If these transactional costs were included, your costs would be higher.

The “Annualized Expense Ratio” reflects the actual expenses net of fee waivers, where applicable, for the six-month period (December 1, 2016 to May 31, 2017) and may be different from the expense ratio in the Financial Highlights which is for the fiscal year ended May 31, 2017.

(1) Expenses are equal to each Class’ annualized expense ratio multiplied by the average account value over the period, multiplied by the number of days (182) in the most recent fiscal half-year, then divided by 365.

(2) Assumes annual return of 5% before expenses.

All mutual funds have operating expenses. As a shareholder of a Fund, you incur operating expenses, including investment advisory fees, distribution (12b-1) and shareholder services fees, where applicable, and other Fund expenses. Such expenses, which are deducted from a Fund’s gross income, directly reduce the investment return of a Fund. A Fund’s expenses are expressed as a percentage of its average net assets. This figure is known as the expense ratio. The Expense Tables provided below are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the six-month period shown and held for the entire six-month period (December 1, 2016 to May 31, 2017).

The Expense Table that appears for your Fund illustrates your Fund’s costs in two ways.

- Actual Expenses.** This section helps you to estimate the actual expenses after fee waivers that you paid over the period. The “Ending Account Value” shown is derived from the Fund’s actual return, and “Expenses Paid During Period” shows the dollar amount that would have been paid by an investor who started with \$1,000 in the Fund. You may use the information here, together with the amount you invested, to estimate the expenses that you paid over the period. To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for your Class of a Fund under the heading “Expenses Paid During Period.”
- Hypothetical Example for Comparison Purposes.** This section is intended to help you compare your Fund’s costs with those of other mutual funds. It is based on your Fund’s actual expense ratio and assumes that your Fund had an annual return of 5% before expenses during the period shown. In this case — because the return used is not your Fund’s actual return — the results may not be used to estimate your actual ending account value or expenses you paid during this period. The example is useful in making comparisons between your Fund and other funds because the U.S. Securities and Exchange Commission (the “SEC”) requires all mutual funds to calculate expenses based on an assumed annual 5% return. You can assess your Fund’s costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Thomas R. Rus One East Pratt Street, 5th Floor Baltimore, MD 21202 57	Secretary	Since February 2015	Director of Regulatory Fund Administration, PNC Capital Advisors, LLC since February 2015; Chief Compliance Officer, Institutional Shareholder Services Inc. 2014-2015; Chief Compliance Officer, Kroll Bond Rating Agency, Inc. 2010-2014; Vice President, Chief Compliance Officer and Assistant Secretary, MTB Investment Advisors, Inc. and MTB Funds, 2003-2010.	N/A	N/A

¹Each Trustee can be contacted by writing to PNC Funds, c/o PNC Capital Advisors, LLC, One East Pratt Street, 5th Floor, Baltimore, MD 21202, Attention: Thomas R. Rus.

²With respect to the term of office for each Trustee of the Trust, the Trustees have adopted a retirement policy in which each will retire at the calendar year end in the year in which he/she reaches the age of 75 years old. With respect to the term of office for each officer of the Trust, pursuant to the Trust's By-Laws any officer may be removed by the Board at any regular or special meeting of the Board or the extent permitted by the Board, by the President. In addition, any Trustee or officer may resign at any time by giving written notice to the Trust. Such resignation shall be effective upon receipt, unless specified to be effective at some later time.

³The "Fund Complex" is comprised of two registered investment companies for which PCA or any of its affiliates serves as investment adviser. The number of portfolios overseen by the Trustees includes the PNC Funds (twenty-nine portfolios) and the PNC Advantage Funds (one portfolio).

⁴Includes directorships of companies required to report to the U.S. Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended (i.e., "public companies"), or other investment companies registered under the Investment Company Act of 1940.

For more information regarding the trustees and officers, please refer to the Statement of Additional Information, as supplemented, which is available, without charge, upon request by calling 1-800-622-FUND (3863).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders of PNC Government Money Market Fund and PNC Treasury Money Market Fund and Board of Trustees of PNC Funds and to the Shareholders of PNC Advantage Institutional Treasury Money Market Fund and Board of Trustees of PNC Advantage Funds:

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of PNC Government Money Market Fund and PNC Treasury Money Market Fund (the “Money Market Funds”) (two of the twenty-nine funds comprising PNC Funds) as of May 31, 2017, the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods presented. We have also audited the accompanying statement of assets and liabilities, including the schedule of investments, of PNC Advantage Institutional Treasury Money Market Fund (the fund comprising PNC Advantage Funds) (collectively with the Money Market Funds, the “Funds”) as of May 31, 2017, the related statement of operations for the year then ended, the statement of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods presented. These financial statements and financial highlights are the responsibility of the Funds’ management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Funds are not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds’ internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of May 31, 2017, by correspondence with the custodian, transfer agents and brokers; when replies were not received from brokers and transfer agents, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of each of the Funds as of May 31, 2017, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America.

⁽¹⁾ During the fiscal year ended May 31, 2014, the Underwriter committed to make a voluntary expense reimbursement to Class A Shares. This voluntary commitment represented a 0.05% impact to Class A ratios and represented shareholder services fees paid to the Underwriter in prior fiscal years in its role as default broker-dealer to certain Class A shareholders. Excluding this item, the expense ratio would have been higher and the net investment income ratio would have been lower.

⁽²⁾ Advisor Class Shares commenced operations on September 14, 2015. All ratios for the fiscal year ended May 31, 2016 have been annualized. Total return for the fiscal year ended May 31, 2016 has not been annualized.

1. Fund Organization

PNC Funds and PNC Advantage Funds (the “Trusts”), each a Delaware statutory trust, are registered under the Investment Company Act of 1940 (the “1940 Act”), as open-end management investment companies. As of May 31, 2017, the Trusts offered for sale shares of 30 Funds (collectively, the “Funds”). PNC Advantage Institutional Treasury Money Market Fund is the sole series of PNC Advantage Funds; PNC Government Money Market Fund and PNC Treasury Money Market Fund are each a series of PNC Funds. Each of the Funds is authorized to issue various classes of shares (individually, a “Class”, collectively, the “Classes”). Each share class represents an interest in the same portfolio of investments of the respective Fund and is substantially the same in all respects, except that the classes are generally subject to different distribution (12b-1) fees and/or shareholder services fees, sales charges and investment minimums. With respect to the PNC Money Market Funds, as defined below, Class I, Advisor Class, Class A, Institutional, Advisor and Service Shares are sold without a sales charge.

Effective June 8, 2016, PNC Tax Exempt Money Market Fund was liquidated pursuant to a plan approved by the Board of Trustees (the “Board”) on February 25, 2016.

As of May 31, 2017, the Trusts offered five categories of Funds:

Target Date Funds

PNC Retirement Income Fund, PNC Target 2020 Fund, PNC Target 2030 Fund, PNC Target 2040 Fund and PNC Target 2050 Fund;

Equity Funds

PNC Balanced Allocation Fund, PNC Emerging Markets Equity Fund, PNC International Equity Fund, PNC International Growth Fund, PNC Multi-Factor All Cap Fund, PNC Multi-Factor Large Cap Growth Fund, PNC Multi-Factor Large Cap Value Fund, PNC Multi-Factor Small Cap Core Fund, PNC Multi-Factor Small Cap Growth Fund, PNC Multi-Factor Small Cap Value Fund, PNC S&P 500 Index Fund and PNC Small Cap Fund;

Fixed Income Funds

PNC Bond Fund, PNC Government Mortgage Fund, PNC Intermediate Bond Fund, PNC Limited Maturity Bond Fund, PNC Total Return Advantage Fund and PNC Ultra Short Bond Fund;

Tax Exempt Bond Funds

PNC Intermediate Tax Exempt Bond Fund, PNC Maryland Tax Exempt Bond Fund, PNC Ohio Intermediate Tax Exempt Bond Fund and PNC Tax Exempt Limited Maturity Bond Fund; and

Money Market Funds

PNC Government Money Market Fund, PNC Treasury Money Market Fund and PNC Advantage Institutional Treasury Money Market Fund.

The financial statements presented herein are those of the Money Market Funds (each referred to as a “Fund,” or collectively as the “Funds”). The financial statements of the Target Date Funds, Equity Funds, Fixed Income Funds and Tax Exempt Bond Funds are not presented herein, but are presented separately.

Fund Reorganization

On June 4, 2015, the Board approved an agreement and plan of reorganization (the “Reorganization”) to which PNC Advantage Institutional Government Money Market Fund (the “Target Fund”), a money market fund organized under a separate trust and managed by PNC Capital Advisors, LLC (the “Adviser”), would be reorganized with and into PNC Government Money Market Fund (the “Acquiring Fund”). On September 14, 2015, the Target Fund was reorganized into the Acquiring Fund, each of which has substantially similar investment objectives and identical principal investment strategies. The net assets of the Target Fund were transferred at fair value in a tax-free exchange to the Acquiring Fund after the close of business on September 11, 2015. With this transfer, a shareholder of the Target Fund’s Institutional Shares automatically became a shareholder of Class I Shares of the Acquiring Fund. A shareholder of the Target Fund’s Advisor Shares became a shareholder in the newly formed Advisor Class of the Acquiring Fund.

NOTES TO FINANCIAL STATEMENTS

May 31, 2017

2. Significant Accounting Policies

The preparation of financial statements in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. Each Fund qualifies as an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to the Investment Companies Topic of U.S. GAAP.

The following is a summary of significant accounting policies followed by the Funds.

Investment Valuation

The investments of the Funds, other than investments in other money market funds, funding agreements and repurchase agreements, are valued at amortized cost, which approximates market value. The amortized cost method values an investment at its cost at the time of purchase and thereafter assumes a constant proportionate accretion of discount or amortization of premium to its effective maturity. If this method is determined to be unreliable during certain market conditions or for other reasons, a Fund may value its investments at market price, or fair value prices may be determined in good faith using methods approved by the Board. No such investments held on May 31, 2017 were valued using a method other than amortized cost.

Investments in other money market funds are valued at their respective net asset values (“NAV”) as determined by those funds each business day.

Investments in repurchase agreements and funding agreements are generally valued at par, which approximates market value, each business day.

Fair value represents the estimated price that the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal market, or in the absence of a principal market, the most advantageous market for the investment. Valuation techniques should maximize the use of observable market data and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing an asset. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

Fair value measurements utilize a hierarchy based on the observability of inputs used to establish fair value. These inputs, listed below, are summarized in three broad levels and investment assets reported at fair value are classified on the basis of the lowest level input that is significant to fair value:

- Level 1 — quoted prices in active markets for identical assets and liabilities, including, but not limited to:

Investment Companies – investments in open-end mutual funds which are valued at their closing NAV.

- Level 2 — other significant observable inputs, including but not limited to:

All Securities – quoted prices for similar securities; quoted prices based on recently executed transactions; adjusted quoted prices based on observable and formulaic inputs; or, observable correlated market inputs.

Fixed Income Securities, Money Market Fund Investments Valued at Amortized Cost and Funding and Repurchase Agreements Valued at Par – independent pricing service-supplied valuations or quoted prices for similar securities or obligations, including matrix pricing, based on methods which consider standard inputs such as yields or prices of securities or obligations of comparable quality, stability, risk, coupon, collateral (as applicable), maturity, type, trading factors, multiple indications of value from dealers or other financial institutions that trade the securities or obligations.

- Level 3 — significant unobservable inputs, including but not limited to:

All Securities – modeling or manual pricing based on each Fund’s own assumptions in determining fair value of investments; or, the significant use of unobservable inputs or stale inputs.

Each Fund recognizes transfers into and out of levels, if any, at the end of the reporting period.

The inputs and methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The valuation hierarchy of each Fund’s securities as of May 31, 2017 can be found at the end of each Fund’s Schedule of Investments.

Investment Transactions, Investment Income and Expenses

Investment transactions are recorded on a trade date basis for financial statement preparation purposes. Realized gains and losses on investments sold are recorded on the identified cost basis. Interest income is recorded on the accrual basis. Discounts and premiums are accreted and amortized, respectively, to interest income over the estimated lives of the respective investments using the effective interest method. Expenses common to all of the Funds are allocated among the Funds based on a number of factors, including each Fund’s respective average net assets or other appropriate allocation methodologies, such as a fixed or equal allocation across Funds. Prior to May 15, 2017, expenses common to all Classes, investment income, and realized and unrealized gains and losses on investments were allocated to each Class based on their relative daily net assets. Effective May 15, 2017, this allocation methodology was changed to the settled shares method which allocates to each Class based on relative daily net assets, excluding the value of subscriptions receivable. The settled shares allocation methodology is consistent with the Funds’ daily distribution rate calculation methodology. This change did not have a material impact on the financial statements for the year ended May 31, 2017. Distribution (12b-1) fees and shareholder services fees relating to a specific Class are charged directly to that Class.

Dividends and Distributions to Shareholders

Dividends from net investment income for each of the Funds are declared daily and paid monthly. Any net realized capital gains will be distributed at least annually by each of the Funds. Dividends and distributions to shareholders are recorded on the ex-dividend date.

Delayed-Delivery Transactions

Certain Funds may purchase or sell securities on a delayed-delivery basis. These transactions involve a commitment by a Fund to purchase or sell securities for a predetermined price or yield, with payment and delivery taking place beyond the customary settlement period. When delayed-delivery purchases are outstanding, a Fund will designate liquid assets in the amount sufficient to meet the purchase price. When purchasing a security on a delayed-delivery basis, a Fund assumes the rights and risks of ownership of the security, including the risk of price and yield fluctuations, and takes such fluctuations into account when determining its NAV. A Fund may dispose of or renegotiate a delayed-delivery transaction after it is entered into, and may sell delayed-delivery securities before they are delivered, which may result in a capital gain or loss. When a Fund has sold a security on a delayed-delivery basis, the Fund does not participate in any future gains and losses with respect to the security.

Repurchase Agreements

Each Fund, with the exception of Treasury Money Market Fund, may engage in repurchase agreement transactions. Under the terms of a typical repurchase agreement, a Fund purchases a debt obligation from a financial institution such as a bank or broker-dealer, subject to a mutual agreement that the seller will repurchase the obligation at an agreed-upon price and time. The debt obligation is collateralized by securities held in safekeeping by the Fund’s custodian or another qualified custodian or in the Federal Reserve/U.S. Treasury book-entry system with value no less than the repurchase price (including accrued interest). A custody agreement in connection with the Master Repurchase Agreement defines eligible securities for collateral in relation to each repurchase agreement. If the seller defaults on its repurchase obligation, the Fund maintains the right to sell the underlying securities at market value. Upon an event of default under the Master Repurchase Agreement, if the seller defaults and the value of the collateral security declines or if the seller enters an insolvency proceeding, the Fund may suffer time delays and incur costs in connection with the disposition of the collateral security and recovery of any losses incurred.

At period end, certain Funds had investments in repurchase agreements. The gross value and related collateral received for these investments are presented in each applicable Fund’s Schedule of Investments and the value of these investments is also presented in the Statements of Assets and Liabilities. The value of the related collateral received exceeded the value of the repurchase agreements as of May 31, 2017.

NOTES TO FINANCIAL STATEMENTS

May 31, 2017

Master Agreements and Netting Arrangements

Certain Funds are parties to various agreements, including but not limited to Master Repurchase Agreements, which govern the terms of certain transactions with select counterparties (collectively “Master Agreements”). These Master Agreements generally include provisions for general obligations, agreements, representations, collateral and certain events of default or termination. These Master Agreements also include provisions for netting arrangements that help reduce credit and counterparty risk associated with relevant transactions. The netting arrangements are generally tied to credit related events that, if triggered, would cause an event, default or termination giving a Fund or counterparty the right to terminate early and cause settlement, on a net basis, of all transactions under the applicable Master Agreement. In the event of an early termination or default event, the total market value exposure would be offset against collateral exchanged to date, which would result in a net receivable or payable that would be due from or to the counterparty. Credit related events include, but are not limited to, bankruptcy, failure to make timely payments, restructuring, obligation acceleration, obligation default, a material decline in net assets, decline in credit rating or repudiation/moratorium. An election made by a counterparty to terminate a transaction early under a Master Agreement could have an adverse impact on a Fund’s financial statements. Master Agreements can also help limit counterparty risk by specifying collateral posting arrangements at pre-arranged exposure levels. Collateral under the Master Agreements is usually in the form of cash, U.S. Treasury or U.S. Government agency securities, but can include other types of securities. There can be no assurance that the Master Agreements will be successful in limiting credit or counterparty risk. Details of the counterparties and the collateral as of May 31, 2017 are included in each Fund’s Schedule of Investments.

3. Investment Advisory Fees and Other Transactions with Affiliates**Investment Advisory Fees**

Fees paid by the Funds pursuant to the Advisory Agreement with PNC Capital Advisors, LLC (the “Adviser”), an indirect wholly owned subsidiary of The PNC Financial Services Group, Inc. (“PNC Group”), are payable monthly and are calculated at an annual rate of each Fund’s average daily net assets. The Adviser may, from time to time, waive any portion of its fees and reimburse certain expenses of a Fund. Such waivers and reimbursements are voluntary and may be changed or discontinued at any time. Any such waivers and reimbursements are not subject to recoupment by the Adviser. The table below lists the advisory fees, waivers and expense reimbursements that were in effect during the fiscal year ended May 31, 2017.

During the fiscal year ended May 31, 2017, the Adviser voluntarily agreed to waive advisory fees and reimburse expenses to the extent necessary to maintain a minimum daily net yield of at least 0.03% for PNC Government Money Market Fund and 0.01% for PNC Treasury Money Market Fund and PNC Advantage Institutional Treasury Money Market Fund.

	Annual Rate	Fee Waiver	Net Annual Rate	Expense Reimbursement
Government Money Market Fund	0.15%	0.00%	0.15%	0.00%
Treasury Money Market Fund	0.15%	0.00%*	0.15%	0.00%
Advantage Institutional Treasury Money Market Fund	0.15%	0.00%*	0.15%	0.00%

* Ratios for the period rounded to 0.00%.

Shareholder Services Fees

The Trusts maintain Shareholder Services Plans (the “Services Plans”) with respect to the Class A and Advisor Class Shares of PNC Funds and Advisor and Service Shares of PNC Advantage Funds. Pursuant to the Services Plans, the Trusts enter into shareholder servicing agreements with certain financial institutions, including affiliates of the Adviser, under which they agree to provide, for PNC Funds, shareholder administrative services to their customers who beneficially own Class A and Advisor Class Shares in consideration for payment of up to 0.25% of the average daily net assets of each Fund’s Class A Shares and up to 0.10% of the average daily net assets of each Fund’s Advisor Class Shares and for PNC Advantage Funds, shareholder administrative services to their customers who beneficially own Advisor and Service Shares in consideration for payment of up to 0.10% and 0.25% of the average daily net assets attributable to Advisor and Service Shares, respectively. During the fiscal year ended May 31, 2017, the shareholder administrative services accrual was at an annual rate of 0.00% for each of the PNC Money Market Funds.

Trustees’ Fees

For his or her service as a Trustee of the Trusts, each Trustee, effective January 1, 2017, receives an annual fee of \$85,000 plus \$7,750 for each Board meeting attended in person, and such amount, up to a maximum of \$3,750, as may be determined for each special Board meeting attended, in addition to a reimbursement of all out-of-pocket expenses incurred as a Trustee. Each Trustee also receives \$800 for

each Audit Committee meeting attended. The Chairman of the Board receives an additional fee of \$25,000 per year and the Chairman of the Audit Committee receives an additional fee of \$10,000 per year for their services in these capacities. Prior to January 1, 2017, each Trustee received an annual fee of \$79,000 plus \$7,250 for each Board meeting attended in person, and such amount, up to a maximum of \$3,250, as may be determined for each special Board meeting attended, in addition to a reimbursement of all out-of-pocket expenses incurred as a Trustee. The Chairman of the Board received an additional fee of \$25,000 per year and the Chairman of the Audit Committee received an additional fee of \$10,000 per year for their services in these capacities. No person who is an officer, director, trustee, or employee of the Adviser, the Underwriter, or any parent or subsidiary thereof, who serves as an officer, trustee, or employee of the Trusts receives any compensation from the Trusts. Fees are paid quarterly in arrears and are allocated to the Funds based on a number of factors, including their average daily net assets.

Trustees who receive fees are eligible for participation in the Trust's Deferred Compensation Plan (the "Plan"), which is an unfunded, nonqualified deferred compensation plan. The Plan allows each eligible Trustee to defer receipt of all or a percentage of fees that would otherwise be payable for services performed.

Administration Fees

The Trusts, The Bank of New York Mellon ("BNY Mellon") and the Adviser are parties to Co-Administration and Accounting Services Agreements, pursuant to which BNY Mellon and the Adviser serve as Co-Administrators to the Trusts. Prior to October 1, 2016, BNY Mellon and the Adviser served as Co-Administrators to PNC Funds in exchange for fees at the annual rate of 0.05% based on average daily net assets of PNC Funds (excluding the Target Date Funds). Also prior to October 1, 2016, for their services to PNC Advantage Funds as Co-Administrators, BNY Mellon received fees at the annual rate of 0.0125% of PNC Advantage Institutional Treasury Money Market Fund's first \$1 billion of average daily net assets and 0.01% of such Fund's average daily net assets in excess of \$1 billion and the Adviser received fees at the annual rate of 0.01% of PNC Advantage Institutional Treasury Money Market Fund's average net assets.

Effective October 1, 2016, a new fee schedule was implemented whereby BNY Mellon and the Adviser are entitled to an annual fee paid by each series of PNC Funds and PNC Advantage Funds (excluding the Target Date Funds) as follows: 0.05% of the Fund's average aggregate net assets up to \$1 billion, 0.03% of the Fund's average aggregate net assets between \$1 billion and \$10 billion, and 0.01% of the Fund's average aggregate net assets in excess of \$10 billion. For their services to the PNC Money Market Funds as Co-Administrators during the fiscal year ended May 31, 2017, approximately 0.0124% was allocated to BNY Mellon and approximately 0.0272% was allocated to the Adviser in aggregate. Total fees paid by the PNC Money Market Funds to the Adviser for the fiscal year ended May 31, 2017 were \$3,048,809.

BNY Mellon also receives other transaction-based charges from the Trusts and is reimbursed for out-of-pocket expenses by the Trusts.

Affiliated Money Market Funds

Pursuant to SEC rules, the Funds may invest cash balances not otherwise invested in portfolio securities to purchase shares of other money market funds offered by the Trusts, or the money market funds of BlackRock Funds. The Funds will bear the costs and fees associated with investments in other investment companies, including other investment companies managed by the Adviser or its affiliates, except that the Adviser has agreed to waive its advisory fee in an amount equal to the advisory fee paid to the Adviser by a PNC money market fund with respect to a Fund's short-term cash reserves swept into a PNC money market fund. Certain other contractual and voluntary advisory fee waivers may reduce the Adviser's obligation to waive its advisory fees in connection with such investments. This waiver may be terminated at any time without prior notice.

PNC Group owns a minority interest in BlackRock, Inc. As a result, the BlackRock Funds could be deemed to be affiliates of the Adviser.

The amount invested by PNC Treasury Money Market Fund in BlackRock Treasury Trust Fund remained unchanged during the fiscal year ended May 31, 2017.

Details of affiliated holdings at May 31, 2017 are included in the respective Fund's Schedule of Investments.

Dividends received from such investment are reported as "Income from affiliate" in the Fund's Statement of Operations.

NOTES TO FINANCIAL STATEMENTS

May 31, 2017

4. Custodian, Distribution/12b-1 and Transfer Agent Fees**Custodian Fees**

BNY Mellon serves as the Custodian of the Trusts. The Custodian fees for the Trusts (excluding the Target Date Funds) are calculated at the following annual rate: 0.0025% of the first \$5 billion of the combined average daily gross assets of the Trusts (excluding the Target Date Funds), 0.002% of the next \$5 billion of the combined average daily gross assets of the Trusts (excluding the Target Date Funds) and 0.001% of the combined average daily gross assets in excess of \$10 billion of the Trusts (excluding the Target Date Funds). The Custodian fees are allocated to the Trusts (excluding the Target Date Funds) based on each Fund's relative average daily net assets. BNY Mellon also receives other transaction-based charges from the Trusts and is reimbursed for out-of-pocket expenses by the Trusts.

Distribution/12b-1 Fees

For its services to the Trusts, the Underwriter, a wholly owned subsidiary of Foreside Financial Group, LLC, receives an annual fee payable directly by the Adviser. PNC Funds has adopted a distribution plan for Class A Shares in accordance with Rule 12b-1 under the 1940 Act ("Rule 12b-1"). Pursuant to the Class A Shares plan, PNC Government Money Market Fund and PNC Treasury Money Market Fund reimburse the Underwriter for direct and indirect costs and expenses incurred in connection with advertising, marketing and other distribution services in an amount not to exceed 0.10% per annum of the average daily net assets of those Funds' Class A Shares. The Board renewed a commitment whereby actual distribution fees for Class A Shares will be no more than 0.00% per annum. This commitment continues through September 28, 2017, at which time the Board will consider whether to renew, revise or discontinue it.

During the fiscal year ended May 31, 2017, the 12b-1 accrual was at an annual rate of 0.00% for each of PNC Government Money Market Fund and PNC Treasury Money Market Fund.

Transfer Agent

BNY Mellon serves as Transfer Agent for the Funds. For its services as Transfer Agent, BNY Mellon receives a fee based primarily upon the number of accounts serviced. Certain minimum fees and transaction charges may apply. Fees are allocated to the Funds based on a number of factors, including number of accounts serviced.

5. Federal Income Taxes

Each Fund is classified as a separate taxable entity for Federal income tax purposes and intends to continue to qualify as a separate "regulated investment company" under Subchapter M of the Internal Revenue Code of 1986, as amended, and make the requisite distributions to shareholders that will be sufficient to relieve it from Federal income tax and Federal excise tax. Therefore, no Federal tax provision is required.

Each Fund evaluates tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as an expense during the current year. A tax position that does meet the more-likely-than-not threshold shall be measured as the largest amount of tax benefit that is greater than 50 percent likely of being realized upon settlement with the relevant taxing authority. Management has analyzed each Fund's tax positions through the fiscal year ended May 31, 2017 and for each Fund's open tax years (years ended May 31, 2014 through May 31, 2016) and has concluded that no provision for income tax is required in each Fund's financial statements.

The tax character of dividends and distributions paid during the fiscal years ended May 31, 2017 and May 31, 2016 were as follows:

	Ordinary Income (000)
Government Money Market Fund	
2017	\$26,869
2016	783
Treasury Money Market Fund	
2017	2,334
2016	103
Advantage Institutional Treasury Money Market Fund	
2017	1,076
2016	68

As of May 31, 2017, the components of total net assets on a tax basis were as follows:

	Paid-in Capital (000)	Undistributed Ordinary Income (000)	Capital Loss Carryforward (000)	Late-Year Losses Deferred (000)	Other Temporary Differences (000)	Total Net Assets (000)
Government Money Market Fund	\$8,989,196	\$91	\$ –	\$–	\$(236)	\$8,989,051
Treasury Money Market Fund	1,067,444	48	(8)	–	(110)	1,067,374
Advantage Institutional Treasury Money Market Fund	543,274	24	–*	–*	(32)	543,266

*Amount represents less than \$500.

The amount of dividends from net investment income and distributions from net realized capital gains are determined in accordance with Federal income tax regulations, which may differ from those amounts determined under U.S. GAAP. These book/tax differences are either temporary or permanent in nature and are attributable primarily to differences in the book/tax treatment of deferred compensation. The character and timing of dividends and/or distributions made during the year from net investment income and/or net realized capital gains may differ from the year that the income or realized capital gains (losses) were recorded by the Funds. To the extent any of these differences are permanent, adjustments are made to the appropriate equity accounts in the period that the differences arise. Accordingly, the following permanent differences have been reclassified to/from the following accounts for the fiscal year ended May 31, 2017:

	Undistributed (Distributions in Excess of) Net Investment Income (000)	Accumulated Net Realized Losses (000)	Paid-in Capital (000)
Treasury Money Market Fund	\$1	\$–	\$(1)
Institutional Treasury Money Market Fund	1	–	(1)

For Federal income tax purposes, realized capital losses may be carried forward and applied against future realized capital gains. During the fiscal year ended May 31, 2017, capital loss carryforwards that were utilized to offset capital gains were as follows:

	(000)
Government Money Market Fund	\$60
Treasury Money Market Fund	1

At May 31, 2017, the Funds had capital loss carryforwards (in thousands) available to offset future realized capital gains through the indicated expiration dates:

	Expiring May 31,		
	2018	Indefinite	Total
Treasury Money Market Fund	\$8	\$–*	\$8
Advantage Institutional Treasury Money Market Fund	–	–*	–*

*Amount represents less than \$500.

Under the Regulated Investment Company Modernization Act of 2010 (the “Modernization Act”), net capital losses incurred after May 31, 2011 may be carried forward indefinitely with their character retained as short term or long term. Net capital losses incurred prior to May 31, 2011 may be carried forward for eight years and are treated as short-term capital losses in the year to which they were carried. However, the Modernization Act requires that post-enactment net capital losses (i.e., those incurred after May 31, 2011) be used before pre-enactment net capital loss carryforwards, which increases the likelihood that pre-enactment capital loss carryforwards will expire unused.

6. Certain Principal Risks

An investment in a Fund is subject to a number of risks. Below is a discussion of some, but not all, of the risks of investing in the Funds. Please see the relevant Fund’s prospectus for a discussion of the principal risks of investing in the Fund.

NOTES TO FINANCIAL STATEMENTS

May 31, 2017

Each of the Funds may invest up to 5% of its net assets in illiquid securities, which may include securities with contractual restrictions on resale and other securities which may not be readily marketable. The relative illiquidity of some of these securities may adversely affect a Fund's ability to dispose of such securities in a timely manner and at a fair price. Securities acquired under the provisions of Rule 144A can only be traded between qualified institutional buyers. Any such security will not be considered illiquid so long as it is determined by the Board or the Adviser, acting under guidelines approved and monitored by the Board, that an adequate trading market exists for that security. Details of investments in illiquid and/or restricted securities are included in each Fund's Schedule of Investments.

Certain obligations held in the Funds have credit enhancement or liquidity features that may, under certain circumstances, provide for repayment of principal and interest on the obligation upon demand date, interest rate reset date or final maturity. These enhancements may include letters of credit, liquidity guarantees and third-party insurance.

7. Borrowing Arrangements

InterFund Lending

The Trusts have received an exemptive order from the SEC that permits the Funds to lend money and borrow money for temporary purposes directly to and from another Fund pursuant to a master interfund lending agreement. The Money Market Funds do not participate in the interfund lending program as borrowing or lending funds.

8. Indemnifications

In the ordinary course of business, the Funds enter into contracts that contain a variety of indemnifications. The Funds have not historically incurred material expenses in respect of those provisions.

9. SEC-Adopted Amendments

On October 13, 2016, the SEC adopted new and amended rules, as applicable, (the "Rules") to modernize and enhance the reporting and disclosure of information by registered investment companies. The Rules are intended to enhance the quality of information available to investors and allow the SEC to more effectively collect and use data reported by funds. These Rules generally become effective in 2018. Management is currently evaluating the implications of the Rules and the impact on the Funds' financial statement disclosures, if any.

10. Subsequent Events

Subsequent events have been evaluated through the date that the financial statements were issued. There were no material subsequent events identified which required adjustment to, or additional disclosure in, the financial statements.

NOTICE TO SHAREHOLDERS

(Unaudited)

The information set forth below is for each Fund's fiscal year as required by Federal income tax laws. Shareholders, however, must report dividends on a calendar year basis for income tax purposes, which may include dividends for portions of two fiscal years of a Fund. Accordingly, the information needed by shareholders for calendar year 2017 income tax purposes will be sent to them in early 2018. Please consult your tax adviser for proper treatment of this information.

Proxy Voting

A description of the policies and procedures that the Trusts use to determine how to vote proxies relating to their portfolio securities as well as information regarding how the Trusts voted proxies during the most recent 12-month period ended June 30, is available upon request, without charge, by calling 1-800-622-FUND (3863), visiting the website of the Trusts at pncfunds.com, or on the SEC's website at <http://www.sec.gov>.

Quarterly Schedule of Investments

The Form N-Q, which includes a complete schedule of investments, must be filed with the SEC within 60 days of the end of the first and third fiscal quarters of the Trusts. The Forms N-Q of the Trusts are available upon request, without charge, by calling 1-800-622-FUND (3863), visiting the website of the Trusts at pncfunds.com, on the SEC's website at <http://www.sec.gov>, or they may be reviewed and/or copied at the SEC's Public Reference Room in Washington, DC (call 1-800-732-0330 for information on the operation of the Public Reference Room).

Fund Holdings

A monthly listing of the holdings of the PNC Money Market Funds can be found by visiting the website of the Trusts at pncfunds.com.

PNC FUNDS NOTICE OF PRIVACY POLICY & PRACTICES*(Unaudited)*

The funds recognize and respect the privacy concerns and expectations of our customers⁽¹⁾. Federal law gives customers the right to limit some but not all sharing of customer information that we collect. Federal law also requires us to tell you how we collect, share and protect your personal information.

This notice is provided to you so that you will know what kinds of information we collect and the circumstances in which that information may be disclosed to third parties who are not affiliated with the funds.

Collection of Customer Information

The funds collect nonpublic personal information about our customers from the following sources:

- **Account Applications and other forms**, which may include a customer's name, address, social security number, date of birth, and information about a customer's investment goals and risk tolerance;
- **Account History**, including information about the transactions and balances in a customer's accounts; and
- **Correspondence**, written, telephonic or electronic, between a customer and the funds or service providers to the funds.

Disclosure of Customer Information⁽²⁾

The funds may disclose all of the information described above to certain third parties who are not affiliated with the funds under one or more of these circumstances:

- **As Authorized** – if you request or authorize the disclosure of the information.
- **As Permitted by Law** – for example, sharing information with companies who maintain or service customer accounts for the funds is permitted and is essential for us to provide shareholders with necessary or useful services with respect to their accounts.
- **Under Joint Agreements** – the funds may also share information with companies that perform marketing services on our behalf or to other financial institutions with whom the funds have joint marketing agreements, such as The PNC Financial Services Group, Inc. and its affiliates.

These third parties must agree to strict confidentiality provisions to assure the protection of your information.

Sharing of Customer Information

We do not share such customer information with affiliates or non-affiliates for use in their marketing activities.

Security of Customer Information

The funds require service providers to the funds:

- to maintain policies and procedures designed to assure only appropriate access to, and use of, information about customers of the funds; and
- to maintain physical, electronic and procedural safeguards that comply with federal standards to guard nonpublic personal information of customers of the funds.

The funds will adhere to the policies and practices described in this notice regardless of whether you are a current or former shareholder of the funds. If you have any questions concerning this Notice, or about the funds in general, please call: 1-800-622-3863 for PNC Funds.

⁽¹⁾For purposes of this notice, the terms "customer" or "customers" includes individuals who provide nonpublic personal information to the funds, but do not invest in the funds' shares.

⁽²⁾The funds do not share information about shareholders who are residents of California with affiliates of the funds or with unaffiliated companies under joint marketing agreements.
